Exam Questions PL-100

Microsoft Power Platform App Maker

https://www.2passeasy.com/dumps/PL-100/

NEW QUESTION 1
- (Exam Topic 2)
You need to implement the change requested by the operations manager. Which control should you use?
BF70D5D

A. Camera
B. Shape
C. Add picture
D. Image

Answer: D

Explanation:
Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image

NEW QUESTION 2
- (Exam Topic 2)
You need to create the solution assets.
What should you use to create the visualizations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Dashboard visualization	Tool
Sales	▼
	Power BI Desktop only
	Power BI Service only
	Power BI Desktop or Power BI Service
Manufacturing	▼
	Power BI Desktop only
	Power BI Service only
	Power BI Desktop or Power BI Service

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: PowerBI Desktop
The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.
PowerBI Desktop to support many data source. Box 2: PowerBI Desktop or Power BI Service on
A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.
Both support visualizations. Reference:
https://docs.microsoft.com/en-us/power-bi/fundamentals/service-service-vs-desktop

NEW QUESTION 3
- (Exam Topic 2)
You need to implement logic in the app for lost sales. What should you do?

A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:
Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

➢ Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer
purchase order is received.
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 4
- (Exam Topic 3)
You are creating a model-driven app that allows users to create and edit a list of existing accounts. You need to display a list of all active accounts.
Which user interface components should you use?

A. view
B. gallery
C. data table
D. form

Answer: C

Explanation:
Imagine that you have a collection of data (such as a list sales orders, a set of service tickets, or a directory of contacts), and that you want to show this data in your Microsoft PowerApps app in a tabular format, where each column represents a field and each row represents a record. In the past, you might have been able to roughly simulate this visualization, although the process required some effort. However, we've been listening to your requests and are happy to announce that you can now quickly and easily achieve this very typical visualization by using the new Data table control that has been recently added to PowerApps.
Reference:
https://powerapps.microsoft.com/fr-fr/blog/introducing-the-data-table-control/

NEW QUESTION 5
- (Exam Topic 3)
You create a canvas app.
A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to a value greater than zero.
Which section of the App checker results should you check?

A. Rules
B. Performance
C. Accessibility
D. Runtime

Answer: C

Explanation:
The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity. Issues include:
Focus isn't showing
When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION 6
- (Exam Topic 3)
You create a canvas app named Hardware Order that suggests computer hardware to customers.
A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.
You need to configure the business rule.
Which two actions should you perform? Each correct answer presents part of the complete solution.
NOTE: Each correct selection is worth one point.

A. Set the scope of the business rule to Entity.
B. Add a Recommendation action and configure it to enter the order type.
C. Set the scope of the business rule to All Forms.
D. Use the following condition expression:(OrderType Does not begin with [test]) AND (Modified By Does not contain data)

Answer: AD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 7
- (Exam Topic 3)
Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.
You are leaving for a vacation. Another maker will continue customizing the app in your absence.
You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.
What should you export?

A. ununmanaged solution that includes all customizations
B. the default solution
C. a managed solution that includes all customizations
D. the app

Answer: A

Explanation:
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION 8
- (Exam Topic 3)
You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require customizations or the use of additional products.

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/embedded-canvas-app-guidelines https://global.hitachi-solutions.com/blog/canvas-vs-model-driven-apps

NEW QUESTION 9
- (Exam Topic 3)
You are configuring security to enable users to analyze data by using Microsoft Excel templates.
You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File | Save and Close | Actions ▾ | Help ▾

Security role: TemplateAdministrator   **Working on solutions: Default Solution**

Details | Core Records | Marketing | Sales | Service | Business Management | Service Management | Customization | Missing Entities | Business Process Flows | Custom Entities

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit	○	●	○	○	○	○		
Channel Property Group	○	●	○	○	●	●		
Currency	○	●	○	○	●	●		
Document Template	○	○	○	○	○	○		
Mailbox Auto Tracking Folder	◐	◐	◐	◐	◐	○	○	○
Organization		●	○			○		
Personal Document Template	◐	◐	◐	◐	◐	◐	◐	●

Privacy Related Privileges

Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation	●	Dynamics 365 for mobile	●
Export to Excel	○	Go Offline in Outlook	●
Mail Merge	●	Print	●
Sync to Outlook	●	Use Dynamics 365 App for Outlook	●

Miscellaneous Privileges

Act on Behalf of Another User	○	Approve Email Addresses for Users or Queues	○
Assign manager for a user	○	Assign position for a user	○
Assign Territory to User	○	Bulk Edit	○

Key

| ○ None Selected | ◐ User | ◐ Business Unit | ◕ Parent: Child Business Unit | ● Organization |

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

▼
Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

▼
Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

A. Mastered
B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates. Which permission should you change?

▼
Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template. Which permission should you change?

▼
Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

NEW QUESTION 10
- (Exam Topic 3)
You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.
Which formula should you use?

A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
C. UpdateContext({ RunningTotal:5 }); Back()
D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:
You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.
Use the Back and Navigate function to change which screen is displayed. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate

NEW QUESTION 10
- (Exam Topic 3)
An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code. Sales associates must be able to act on the specific data displayed in dashboards.
You need to create the dashboards.
Which type of dashboards should you create? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Type of dashboard
Ensure that all sales associates can view the dashboard.	▼ User System
Ensure that sales associates can interact with data from the dashboards.	▼ Standard Multi-stream Single-stream

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: User
Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.
Box 2: Single-stream
The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier

2 service leads or managers, who monitor fewer, but more complex or escalated cases.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/create-dashboard https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashbo

NEW QUESTION 12
- (Exam Topic 3)
You have the following Common Data Service entities: BusinessContracts and BusinessAccounts. You need to configure an N:N relationship between the two entities.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select **Add relationship** and then select the many-to-many relationship option.	
Select the BusinessAccounts entity as the related entity.	
Open the relationship tab of the BusinessContracts entity.	
Choose the Relationship Name and Relationship Entity Prefix.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships
From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:
Step 2: Select Add relationship.. Create relationships
While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many. Step 3: Select the BusinessAccounts entity as the related entity.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-nn-relationships-portal

NEW QUESTION 15
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app. Solution:

≫ Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.

≫ Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).

≫ Set the data source of the form to Accounts.

≫ Set the Item property of the form to Selected.

≫ Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
View, edit, or create an item, save the contents, and reset the controls in an Edit form control. FormMode.View: The form is populated with an existing record but the user cannot modify the values of the
fields.
This function is often invoked from the OnSelect formula of a Button or Image control. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 19
- (Exam Topic 3)
You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions.
Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between
panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Outcomes

Outcomes
Not visible to any users
Visible to sighted users only
Visible to screen-reader users only
Visible to both sighted and screen-reader users

Answer Area

Action	Outcome
Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Set the Color and other related properties of a control to transparent.	Outcome
Set the Height and Width properties of a control to 1.	Outcome

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION 20
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form.
Proposed solution: Use a Category classification model. Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
A Category classification model categorizes text by its meaning. Reference:
https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/

NEW QUESTION 22
- (Exam Topic 3)
You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.
You need to pick the appropriate solution type for each requirement.
Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution types

Solution types
Managed
Unmanaged

Answer Area

Requirement	Solution type
Edit existing components of the solution.	Solution type
Add new components to the solution.	Solution type
Export the solution.	Solution type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Unmanaged
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Box 2: Unmanaged
Box 3: Managed
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION 24
- (Exam Topic 3)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field. You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add TeamA to the field security profile.
Create a field security profile and set all the permissions for the custom attribute to **Yes**.
Add TeamB to the field security profile.
Create a field security profile and set all the permissions for the custom attribute to **No**.
Enable field-level security for the field.

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Enable field security for the field
Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes. Step 3: Add TeamA to the field security profile.
Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

≫ Enable field security on one or more fields for a given entity.

≫ Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 25
- (Exam Topic 3)
A coworker creates a canvas app.
The canvas app contains the following formula. The formula is attached to the OnVisible property of the first

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1    .
},
{
    Tool: "Screwdriver",
    Quantity: 2
}
)
```

You are updating the canvas app.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	○	○
A local collection is created to store data if a data source named Toolbox does not already exist.	○	○
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Records are added, not updated. Box 2: Yes
The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)
DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.
Item(s) - Required. One or more records or tables to add to the data source. Box 3: No
No records are cleared. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect

NEW QUESTION 30

- (Exam Topic 3)
You are an app maker.
You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution. What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.
B. The prefix used when creating components as part of the default solution can be set to a specific value.
C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:
Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.
Why you shouldn't use the default solutions to manage customizations
There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

≫ The default solution can't be exported; therefore, you can't distribute the default solution to another
environment.
The default solution contains all components and customizations from all solutions in the environment.
By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.
It's difficult to locate or identify the customizations you've made in the environment by using either default solution.
When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations
