Microsoft 365 Messaging

About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that uses a third-party email hygiene system named Service1. Service1 blocks all encrypted email.

All external email is routed through Service1 by using a connector.

Users classify email by using sensitivity labels. Emails classified as Secret are encrypted automatically. You need to ensure that the users can send emails classified as Secret to external recipients.

Which two items should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a remote domain
- B. a connector
- C. a data loss prevention (DLP) policy
- D. a mail flow rule
- E. a label policy

Answer: BD

Explanation:

Use an additional Connector and a Mail Flow Rule to bypass the third-party email hygiene system for emails that have the Secret sensitivity label.

Emails with the sensitivity label will use the new connector. All other emails will use the existing connector. Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/con>

NEW QUESTION 2

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that contains three Azure Active Directory (Azure AD) security groups named Administrators, Managers, and Marketing. The tenant contains the users shown in the following table.

Name	Group membership
User1	Managers
User2	Marketing
User3	Administrators
User4	None

The tenant contains the resources shown in the following table.

Name	Type
ConferenceRoom1	Room
ConferenceRoom2	Room
Projector1	Equipment

ConferenceRoom1 has the following policy.

```
PS C:\> get-calendarprocessing "ConferenceRoom1" | fl Allb*,allr*,booking*,req*,res*
AllBookInPolicy      : False
AllRequestOutOfPolicy : False
AllRequestInPolicy   : False
BookInPolicy         : {/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=7fddfd211974ea68d22dae2c891db02-Managers}
RequestOutOfPolicy   : {}
RequestInPolicy      : {/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=03a5a93a90ad4296907830a3ecla8f94-User2}
ResourceDelegates    : {User4}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can book ConferenceRoom1 automatically without the approval of User4.	<input type="radio"/>	<input type="radio"/>
User2 can book ConferenceRoom1 automatically without the approval of User4.	<input type="radio"/>	<input type="radio"/>
User4 can book ConferenceRoom1 pending approval from User3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

The BookInPolicy allows the Managers group. User1 is in the Managers group so User 1 can book ConferenceRoom1 automatically without the approval of User4.

Box 2: No

The BookInPolicy allows the Managers group. User2 is not in the Managers group so User 2 cannot book ConferenceRoom1 automatically without the approval of User4.

Box 3: No

The RequestInPolicy does not include User4. Therefore, User3 is not allowed to request to book the meeting room either with or without approval.

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/set-calendarprocessing?view=exchange-ps>

NEW QUESTION 3

- (Exam Topic 5)

You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All users use an email address suffix of @contoso.com.

You migrate 200 mailboxes from Server1 to Exchange Online by using Exchange PowerShell cmdlets. Users hosted on Server1 can send email messages to the migrated mailboxes.

In Microsoft 365, you create a new mailbox that uses an email address of user1@contoso.com.

When email is sent from the mailboxes hosted on Server1 to user1@contoso.com, the senders receive a non-delivery report (NDR) that contains the following text:

"550 5.1.10 RESOLVER.ADR.RecipientNotFound; Recipient not found by SMTP address lookup."

You verify that Microsoft 365 mailboxes can send email to user1@contoso.com successfully. You delete the user account and mailbox of User1.

You need to ensure that when new mailboxes are created, all the users at your company can exchange email successfully

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From Azure AD Connect, modify the synchronization settings
- B. From Server1, run the New-RemoteMailbox cmdlet
- C. From Server1, run the Enable-Mailbox cmdlet
- D. From the on-premises network, create new mailboxes, and then migrate the mailboxes to Microsoft 365
- E. From the Exchange admin center, modify the properties of the Outbound connector

Answer: BD

Explanation:

The problem happens because the on-premise Exchange server is not aware of the existence of the mailbox created in Exchange Online. To prevent this happening, new mailboxes need to be created from the on-premise Exchange server.

You can create on Exchange Online mailbox from the on-premise server by running New-RemoteMailbox cmdlet. Alternatively, you can create a local mailbox on the on-premise server and then migrate the mailbox to Exchange Online.

NEW QUESTION 4

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant.

Users report that legitimate email messages are delivered to their Junk Email folder.

You plan to use the Microsoft Remote Connectivity Analyzer to identify the cause of the issue. Which test should you run?

- A. Outlook Connectivity
- B. Inbound SMTP Email
- C. Outbound SMTP Email
- D. Message Analyzer

Answer: D

NEW QUESTION 5

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 has a mobile device. You need to enable Exchange ActiveSync logging for User1 and retrieve the log files.

Which two Exchange Online PowerShell cmdlets should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Get-ActiveSyncDevice
- B. Set-ActiveSyncMailboxPolicy
- C. Set-ClientAccessRule
- D. Get-MobileDeviceStatistics
- E. Set-CASMailbox

Answer: E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/plan-and-deploy/post-installation-tasks/change-oab-generation-sched>

NEW QUESTION 6

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that uses an email domain named contoso.com. You need to prevent all users from performing the following tasks:

- Sending out-of-office replies to an email domain named fabrikam.com.
- Sending automatic replies to an email domain named adatum.com.

The solution must ensure that all the users can send out-of-office replies and automatic replies to other email domains on the internet.

Solution: You create one mail flow rule. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/remote-domains/remote-domains>

NEW QUESTION 7

- (Exam Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

The company has four departments that have the mailboxes shown in the following table.

Department	Number of mailboxes	Location
Finance	500	On-premises
Manufacturing	1,000	Exchange Online
Sales	5,000	On-premises
Marketing	2,000	Exchange Online

The mailboxes are configured as shown in the following table.

Department	Archive	Single item recovery
Finance	Enabled	Enabled
Manufacturing	Disabled	Disabled
Sales	Disabled	Disabled
Marketing	Enabled	Enabled

You have two administrators named Admin1 and Admin2 that are assigned the permissions shown in the following table.

Administrator	Management role group	Organization	Management role
Admin1	Organization Management, Discovery Management	Exchange Online, on-premises	None
Admin2	Organization Management, Discovery Management	Exchange Online, on-premises	Mailbox Import Export

For each of the following statement, select yes if the statement is true. otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Admin1 can search for email messages in every mailbox in the organization by running the <code>New-ComplianceSearch</code> cmdlet.	<input type="radio"/>	<input type="radio"/>
Admin2 can perform a search for a specific keyword in every mailbox of the manufacturing department by running the <code>Search-mailbox</code> cmdlet.	<input type="radio"/>	<input type="radio"/>
Admin1 can delete email message from every mailbox of the marketing department by running the <code>Search-Mailbox</code> cmdlet.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/discovery-management-exchange-2013-help> <https://docs.microsoft.com/en-us/powershell/module/exchange/mailboxes/search-mailbox?view=exchange-ps>

NEW QUESTION 8

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization that uses an Edge Server.

You plan to implement a hybrid deployment between Exchange Online and Exchange Server.

You need to ensure that all the email between Exchange Online and Exchange Server 2019 is sent by using the Edge Server.

Which two hybrid configuration topologies could you deploy to meet the requirements? Each correct answer presents a complete solution.

- A. Modern Minimal
- B. Classic Minimal
- C. Classic Full
- D. Classic Express
- E. Modern Full

Answer: CE

Explanation:

Reference:

<https://www.enowsoftware.com/solutions-engine/what-are-your-exchange-hybrid-options>

NEW QUESTION 9

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. You need to grant User1 the Send on Behalf permission for 20 mailboxes. Which PowerShell cmdlet should you use?

- A. Add-MailboxPermission
- B. Add-MailboxFolderPermission
- C. Set-Mailbox
- D. Add-RecipientPermission

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/recipients/mailbox-permissions?view=exchserver-2019>

NEW QUESTION 10

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains the following email domains:

- > Adatum.com
- > Contoso.com
- > Fabrikam.com

When external recipients receive email messages from the users in the tenant, all the messages are delivered by using the @contoso.com email domain.

You need to ensure that the users send email by using the @fabrikam.com email domain. Solution: From the Microsoft 365 portal, you set fabrikam.com as the default domain. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/setup/domains-faq?view=o365-worldwide#how-do-i-set>

NEW QUESTION 10

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You need to provide a user named User1 with the ability to create and manage transport rules. To which management role group should you add User1?

- A. Compliance Management
- B. Server Management
- C. Records Management
- D. Hygiene Management

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/records-management-exchange-2013-help>

NEW QUESTION 13

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that has anti-spam policies configured.

You need to identify any anti-spam policy settings that were changed during the last three months and review recommendations for increase Microsoft Standard or Stria configurations for Exchange Online anti-spam policies.

What should you use?

- A. Configuration analyzer in Microsoft 365 Defender
- B. Compliance Manager
- C. Microsoft Defender for Cloud Apps
- D. the Insights dashboard in the Exchange admin center

Answer: A

NEW QUESTION 18

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant and the devices shown in the following table.

Name	Operating system	Microsoft Outlook version
Device1	Windows	Outlook 2019
Device2	MacOS	Outlook 2016 for Mac
Device3	iOS	Outlook for iOS
Device4	Windows	Outlook on the web

You plan to implement sensitivity labels for users to apply to email messages.

Which Microsoft Outlook versions will support sensitivity labels without requiring additional software?

- A. Outlook 2019 and Outlook on the web only
- B. Outlook on the web only
- C. Outlook 2019. Outlook 2016 for Ma
- D. Outlook for iO
- E. and Outlook on the web
- F. Outlook for iOS and Outlook on the web only
- G. Outlook 2019 only

Answer: D

NEW QUESTION 21

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization that uses an email domain named contoso.com. You plan to move several mailboxes to Microsoft 365.

You need to configure hybrid mail flow to meet the following requirements:

- > All email messages received from the internet must be filtered for spam by Microsoft 365.
- > Your company's on-premises firewall must allow email messages between the on-premises Exchange servers and Microsoft 365.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Mail exchanger (MX) record to configure:

▼

Mail.contoso.com
 Contoso-com.mail.protection.outlook.com
 Outlook.office365.com

Firewall port to allow:

▼

TCP 25
 TCP 2525
 TCP 587
 TCP 993

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/hybrid-deployment-prerequisites>

NEW QUESTION 24

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that does NOT contain any public folders.

You need to create a new public folder. The solution must ensure that users can create a post by sending an email to the folder.

Which three actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Actions

Assign an Exchange Online license.

Create a public folder mailbox.

Create a public folder.

Create a Microsoft 365 group.

Create a shared mailbox.

Mail-enable the public folder.

Set an email address on a pubic folder.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration-exo/public-folders/create-public-folder> <https://docs.microsoft.com/en-us/exchange/collaboration-exo/public-folders/enable-or-disable-mail-for-public-fo>

NEW QUESTION 29

- (Exam Topic 4)

You discover that email messages sent to contoso.com are NOT delivered through Contoso Connector.

You need to ensure that all email sent to contoso.com is delivered through Contoso Connector. Which connector setting should you modify?

- A. Routing
- B. Security restrictions
- C. Use of connector
- D. Status

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/set>

NEW QUESTION 31

- (Exam Topic 4)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The Safe Attachments 1 policy applies to Alex Wilber	<input type="radio"/>	<input type="radio"/>
If an email message that contains detected malware is sent to Megan Bowen, the attachment will be removed, and the message will be delivered	<input type="radio"/>	<input type="radio"/>
For Lynne Robbins, to block both email messages and attachments that have detected malware, the priority of Safe Attachments 2 must be increased	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, letter, email Description automatically generated

Box 1: Yes

The Safe Attachments 1 policy applies to Group1. Alex Wilber is in Group1. Box 2: No

Megan Bowen is in Group2. The Safe Attachments 2 policy applies to Group2. The Safe Attachments 2 policy will block the email rather than remove the attachment and deliver the email.

Box 3: No

Lynne Robbins is in the Sales department which means she is a member of Group3. She is also a member of Group2 and Group4.

The Safe Attachments 2 policy blocks emails and applies to Group2. There are no other Safe Attachments policies that apply to Group3 or Group4. Therefore, Safe Attachments 2 is the only policy that applies to Lynne Robbins so you do not need to increase the priority of the policy to block the emails.

NEW QUESTION 35

- (Exam Topic 4)

Which contacts can sign in to and access resources in the adatum.com tenant?

- A. Contact1 only
- B. Contact2 only
- C. Contact1 and Contact3 only
- D. Contact2 and Contact3 only
- E. Contact1, Contact2. and Contact3

Answer: D

NEW QUESTION 40

- (Exam Topic 3)

You need to generate a report for the mobile devices that meets the technical requirements. Which PowerShell cmdlet should you use?

- A. Get-DevicePolicy
- B. Get-MobileDevice
- C. Get-MobileDeviceStatistics
- D. Get-DeviceTenantPolicy

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/get-mobiledevice?view=exchange-ps>

NEW QUESTION 44

- (Exam Topic 3)

User3 leaves the company.

You need to ensure that Admin1 and Admin2 can access the mailbox of User3. The solution must meet the technical requirements.

What should you do?

- A. Migrate the mailbox of User3 to a distribution group.
- B. Migrate the mailbox of User3 to a Microsoft 365 group.
- C. Convert the mailbox of User3 into a resource mailbox.
- D. Convert the mailbox of User3 into a shared mailbox.

Answer: D

Explanation:

Fabrikam identifies the following technical requirements:

➤ When users leave the company, remove their licenses and ensure that their mailbox is accessible to Admin1 and Admin2.

If you remove the license from User3, the mailbox will be deleted after 30 days. Converting the mailbox to a shared mailbox will ensure that the mailbox is not deleted. You would still need to give Admin1 and Admin2 permissions to access the mailbox.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/email/convert-user-mailbox-to-shared-mailbox?view=o3>

NEW QUESTION 47

- (Exam Topic 3)

You need to encrypt email between Fabrikam and Litware to support the planned changes. What should you configure in the Exchange admin center?

- A. a connector
- B. an organization relationship
- C. a sharing policy
- D. a remote domain

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/set>

NEW QUESTION 48

- (Exam Topic 2)

You need to resolve the issue for the transport department users.

What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Move the public folder mailbox that contains TransportPF to a server in the main office.
- B. Move TransportPF to a public folder mailbox hosted in the main office.
- C. Modify the default public folder mailbox for all the transport department users.
- D. Instruct the transport department users to add TransportPF to their Favorites list in Outlook.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/recipients/mailbox-moves?view=exchserver-2019>

NEW QUESTION 53

- (Exam Topic 2)

Your company named Contoso, Ltd. has a Microsoft Exchange Server 2019 organization that contains the mailbox databases shown in the following table.

NAME	Description
MBX01	Contains all the mailboxes for the managers at Contoso
MBX02	Contains all the mailboxes for the finance department of Contoso

You need to assign an offline address book (OAB) named Managers to all the users in a group named Managers.

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 58

- (Exam Topic 1)

You need to recommend a solution for the public folders that supports the planned changes and meets the technical requirements.

What should you recommend?

- A. Microsoft SharePoint site mailboxes
- B. Office 365 groups

- C. Resource mailboxes
- D. Public folder replicas

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/migrate-to-office-365-groups?view=exchserver-2019>

NEW QUESTION 63

- (Exam Topic 1)

You need to configure the environment to support the planned changes for email addresses.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

▼

Set-Mailbox
Set-MailboxPlan
Update-EmailAddressPolicy
New-EmailAddressPolicy

-Name 'UserMailboxes'

-RecipientFilter {(RecipientType -eq 'UserMailbox')}

-EnabledEmailAddressTempates ''

▼

SMTP.%s%2g@contoso.com
SMTP.%g%2s@contoso.com
SMTP.%d%2g@contoso.com
SMTP.%2d%s@contoso.com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/exchange/email-addresses-and-address-books/new-emailad> <https://docs.microsoft.com/en-us/Exchange/email-addresses-and-address-books/email-address-policies/email-ad>

NEW QUESTION 65

- (Exam Topic 1)

You must prevent HelpDeskUser1 from repeating the same mistake.

You need to identify which management role provided HelpDeskUser1 with the necessary permissions to make the mistake identified in the problem statement.

Which two cmdlets should you run? Each correct answer presents part of the solution.

- A. Get-RoleGroup
- B. Get-ManagementRoleEntry
- C. Get-RoleGroupMember
- D. Get-ManagementRoleAssignment
- E. Get-ManagementRole

Answer: BD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/exchange/find-exchange-cmdlet-permissions?view=exchange-ps>

NEW QUESTION 68

- (Exam Topic 1)

You need to recommend a solution that meets the security requirements for protecting users. What should you recommend?

- A. From the Security & Compliance admin center, create an ATP safe attachments policy.
- B. From the Exchange admin center in Exchange Online, create a spam filter policy.
- C. From the Security & Compliance admin center, create an ATP anti-phishing policy.
- D. From the Security & Compliance admin center, create an ATP Safe Links policy.

Answer: D

Explanation:

All users must be protected from accessing unsecure websites when they click on URLs embedded in email messages.

NEW QUESTION 69

- (Exam Topic 5)

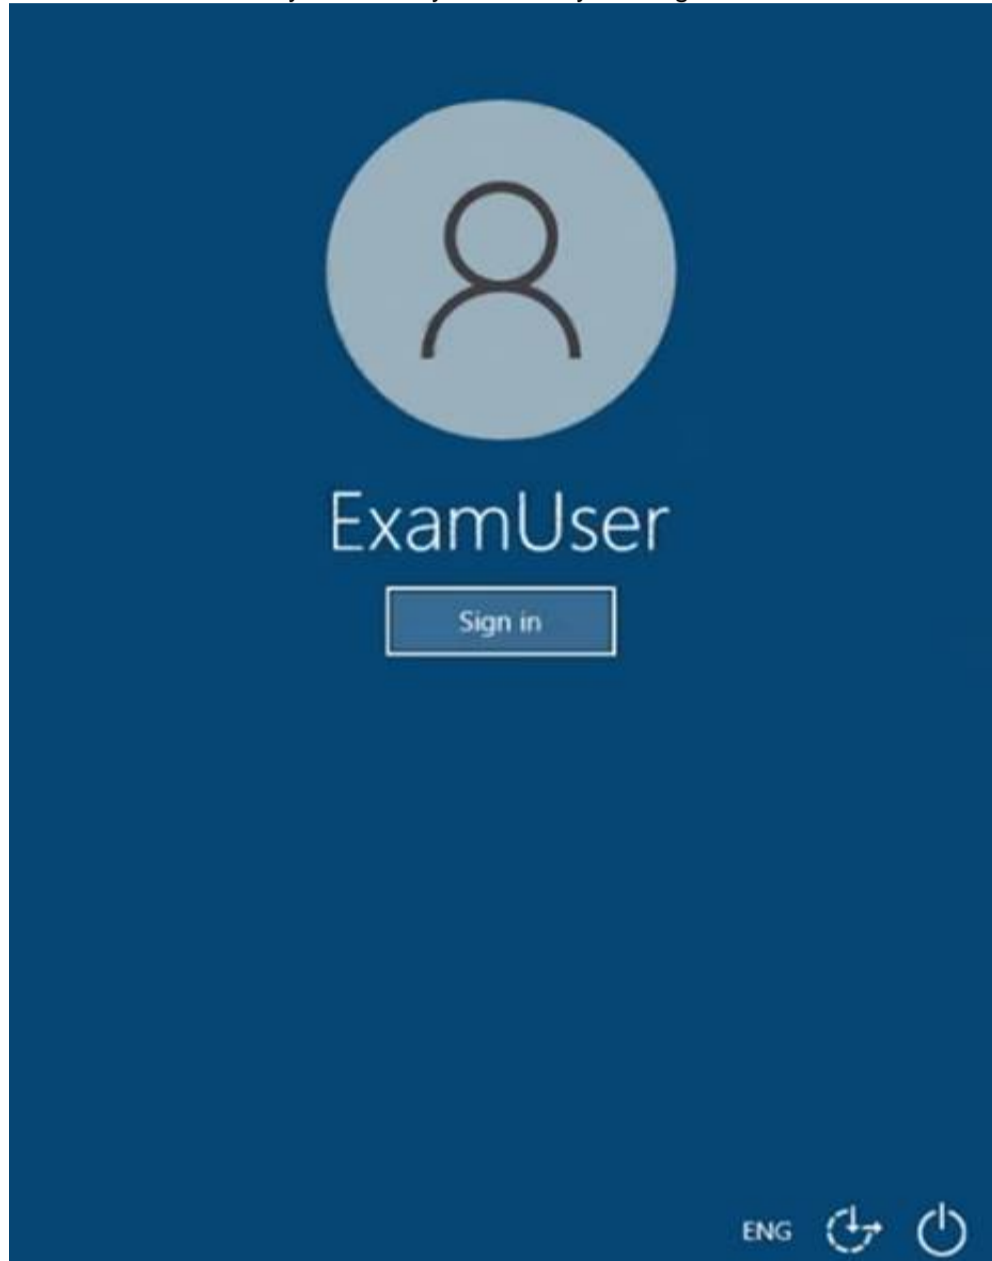

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to prevent email messages from a domain named fabrikam.com from being delivered to the mailboxes of your organization.

To complete this task, sign in to the Microsoft 365 admin center.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

➤ In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & Collaboration > Policies & Rules

>Threat policies

>Anti-spam

in the policies

section. To go directly to the

Anti-spam policies

page, use <https://security.microsoft.com/antispam>.

➤ On the Anti-spam policies

page, click Create policy

and then select Inbound

from the drop down list.

➤ The policy wizard opens. On the Name your policy page, configure these settings:

- Name: Enter a unique, descriptive name for the policy.

- Description: Enter an optional description for the policy. When you're finished, click Next.

➤ On the Users, groups, and domains

applies to (recipient conditions):

page that appears, identify the internal recipients that the policy

- Users: The specified mailboxes, mail users, or mail contacts in your organization.

- Groups: The specified distribution groups, mail-enabled security groups, or Microsoft 365 Groups in your organization.

- Domains: All recipients in the specified accepted domains in your organization.

Click in the appropriate box, start typing a value, and select the value that you want from the results. Repeat

this process as many times as necessary. To remove an existing value, click remove

x next to the value.

For users or groups, you can use most identifiers (name, display name, alias, email address, account name, etc.), but the corresponding display name is shown in the results. For users, enter an asterisk (*) by itself to see all available values.

Multiple values in the same condition use OR logic (for example, <recipient1>

o<r recipient2>). Different

conditions use AND logic (for example, <recipient1>

and<member of group 1>).

- Exclude these users, groups, and domains: To add exceptions for the internal recipients that the policy applies to (recipient exceptions), select this option and configure the exceptions. The settings and behavior are exactly like the conditions.

When you're finished, click Next.

➤ On the Bulk email threshold & spam properties

page that appears, configure the following settings:

- Bulk email threshold: Specifies the bulk complaint level (BCL) of a message that triggers the specified action for the Bulk

spam filtering verdict that you configure on the next page (greater than the specified value,

not greater than or equal to). A higher value indicates the message is less desirable (more likely to resemble spam). The default value is 7. For more information, see Bulk complaint level (BCL) in EOP and What's the difference between junk email and bulk email?.

By default, the PowerShell only setting MarkAsSpamBulkMail

is On in anti-spam policies. This setting

dramatically affects the results of a Bulk

filtering verdict:

MarkAsSpamBulkMail is On: A BCL that's greater than the threshold is converted to an SCL 6 that

corresponds to a filtering verdict of Spam, and the action for the Bulk

_message.

filtering verdict is taken on the

nt.

is taken for Bulk

filtering verdict. In effect, the BCL threshold and Bulk

filtering verdict action are irrelevant.

- Increase spam score, Mark as spam* and Test mode: Advanced Spam Filter (ASF) settings that are turned off by default.

The Contains specific languages

and from these countries

settings are not part of ASF.

- Contains specific languages: Click the box and select On

or Off

from the drop down list. If you turn it on, a

box appears. Start typing the name of a language in the box. A filtered list of supported languages will appear. When you find the language that you're looking for,

select it. Repeat this step as many times as necessary. To

remove an existing value, click remove x

next to the value.

- From these countries*: Click the box and select On

or Off

from the drop down list. If you turn it on, a box

appears. Start typing the name of a country in the box. A filtered list of supported countries will appear. When you find the country that you're looking for, select it.

Repeat this step as many times as necessary. To remove

an existing value, click remove x

When you're finished, click Next.

next to the value.

➤ On the Actions

page that appears, configure the following settings:

- Message actions: Select or review the action to take on messages based on the following spam filtering verdicts:

_ Spam

_ High confidence spam

_ Phishing

_ High confidence phishing

_ Bulk

- Retain spam in quarantine for this many days: Specifies how long to keep the message in quarantine if you selected Quarantine message

as the action for a spam filtering verdict. After the time period expires, the

message is deleted, and is not recoverable. A valid value is from 1 to 30 days.

- Add this X-header text: This box is required and available only if you selected Add X-header

as the action

for a spam filtering verdict. The value you specify is the header field name

that's added to the message header.

The header field value

is always This message appears to be spam.

- Prepend subject line with this text: This box is required and available only if you selected Prepend

subject line with text

message's subject line.

as the action for a spam filtering verdict. Enter the text to add to the beginning of the

- Redirect to this email address: This box is required and available only if you selected the Redirect

message to email address

as the action for a spam filtering verdict. Enter the email address where you want to

deliver the message. You can enter multiple values separated by semicolons (;).

- Enable safety Tips: By default, Safety Tips are enabled, but you can disable them by clearing the checkbox.
- Enable zero-hour auto purge (ZAP): ZAP detects and takes action on messages that have already been delivered to Exchange Online mailboxes. ZAP is turned on by default. When ZAP is turned on, the following settings are available:
_ Enable ZAP for phishing messages: By default, ZAP is enabled for phishing detections, but you can disable it by clearing the checkbox.
_ Enable ZAP for spam messages: By default, ZAP is enabled for spam detections, but you can disable it by clearing the checkbox.
When you're finished, click Next.

➤ On the Allow & block list

flyout that appears, you are able to configure message senders by email address or email domain that are allowed to skip spam filtering.

In the Allowed

section, you can configure allowed senders and allowed domains. In the Blocked section, you

can add blocked senders and blocked domains.

The steps to add entries to any of the lists are the same:

- Click the link for the list that you want to configure:

_ Allowed >Senders: Click Manage (nn) sender(s).

_ Allowed >Domains: Click Allow domains.

_ Blocked >Senders: Click Manage (nn) sender(s).

_ Blocked >Domains: Click Block domains.

_ In the flyout that appears, do the following steps:

Click + Add senders

or Add domains.

In the Add senders

or Add domains

flyout that appears, enter the sender's email address in the Sender box or

the domain in the Domain

box. As you're typing, the value appears below the box. When you're finished

_ typing the email address or domain, select the value below the box.

Repeat the previous step as many times as necessary. To remove an existing value, click remove x

_ value.

next to the

When you're finished, click Add senders

or Add domains.

- Back on the main flyout, the senders or domains that you added are listed on the page. To remove an entry from this page, do the following steps:

Select one or more entries from the list. You can also use the Search

box to find values in the list.

ies

ies

When you're finished, click Done.

Back on the Allow & block list

page, click Next

when you're ready to continue.

➤ On the Review

page that appears, review your settings. You can select Edit

in each section to modify

the settings within the section. Or you can click Back

When you're finished, click Create.

➤ On the confirmation page that appears, click Done.

or select the specific page in the wizard.

NEW QUESTION 72

- (Exam Topic 5)

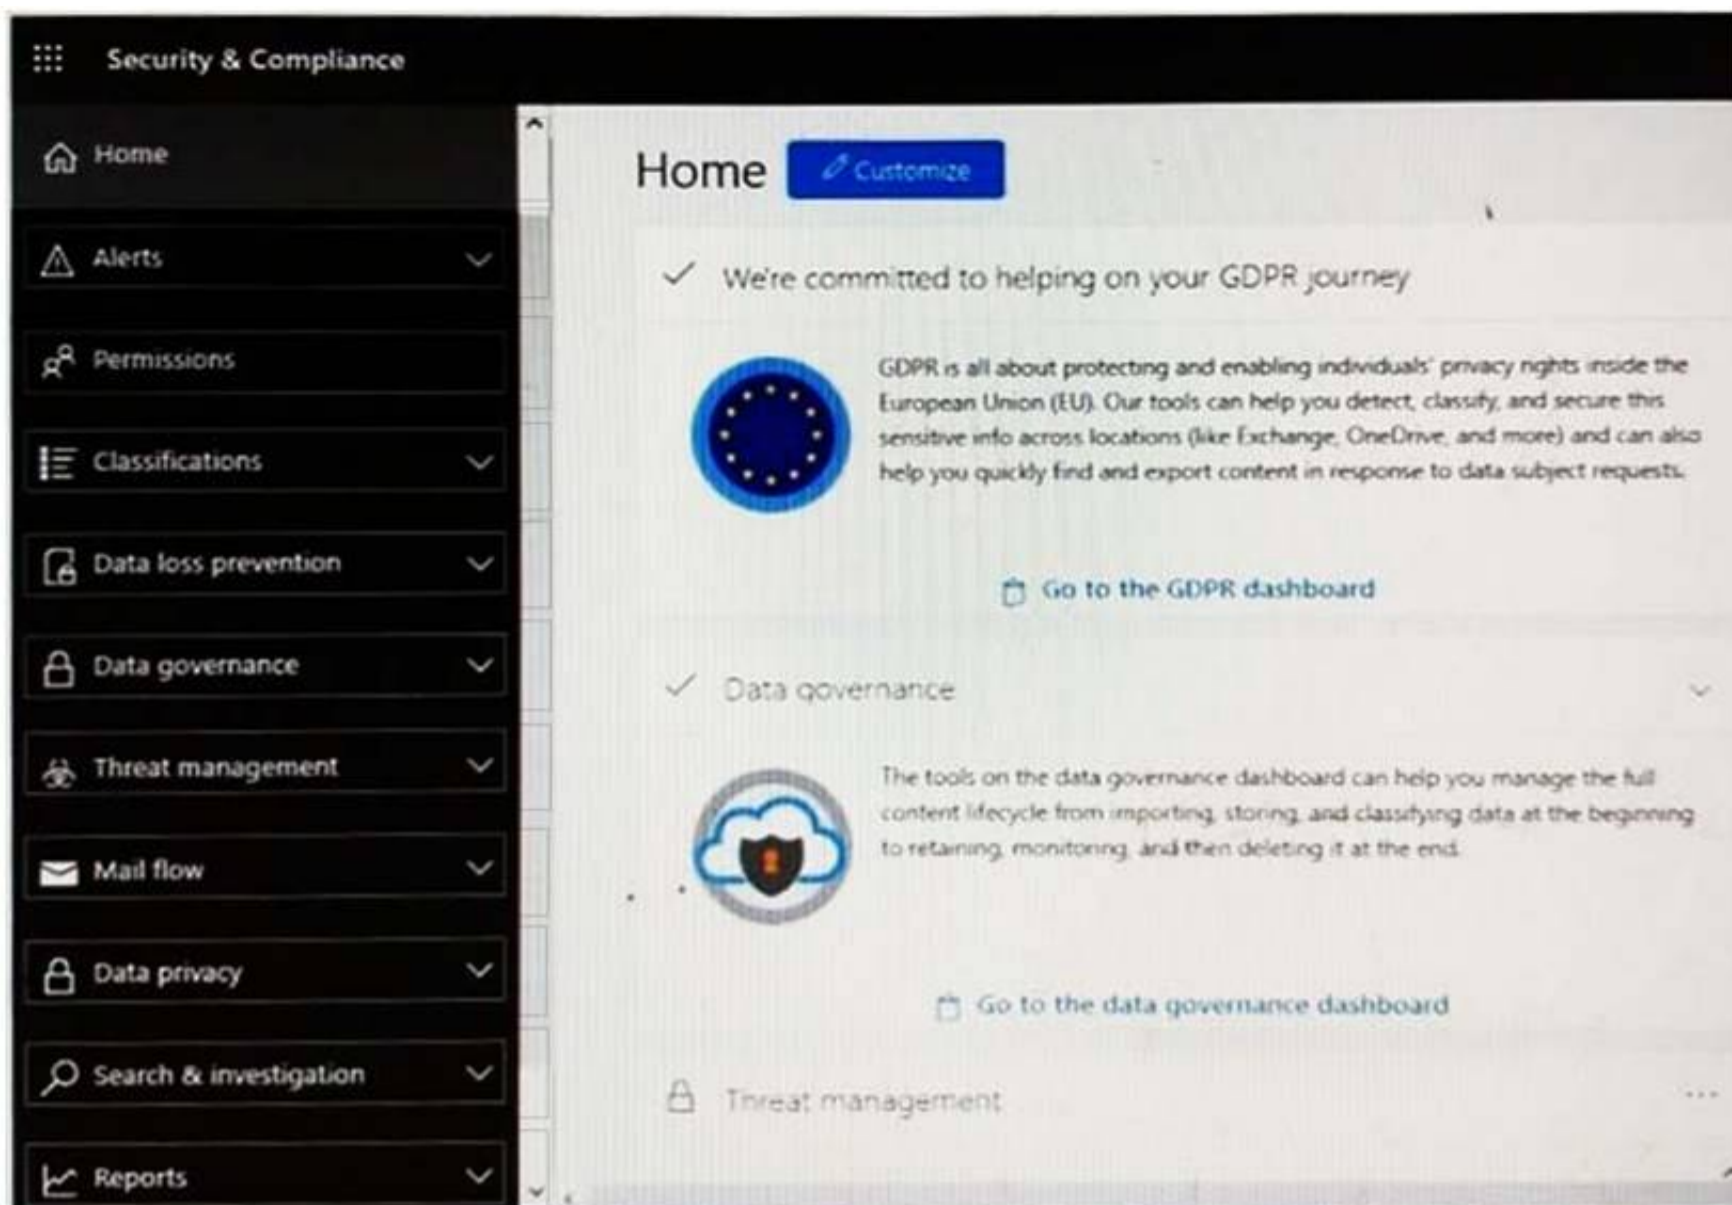

You manage a Microsoft Exchange Online subscription. You use Advanced Threat Protection (ATP).

A partner company sends daily invoices to your company. The invoices are always named AdatumInvoice.xlsx.

Some users report that sometimes they cannot find the invoices in their Inbox folder. You need to identify whether the invoices are identified as malicious by Microsoft 365.

Which two blades should you use? To answer, select the appropriate blades in the answer area.

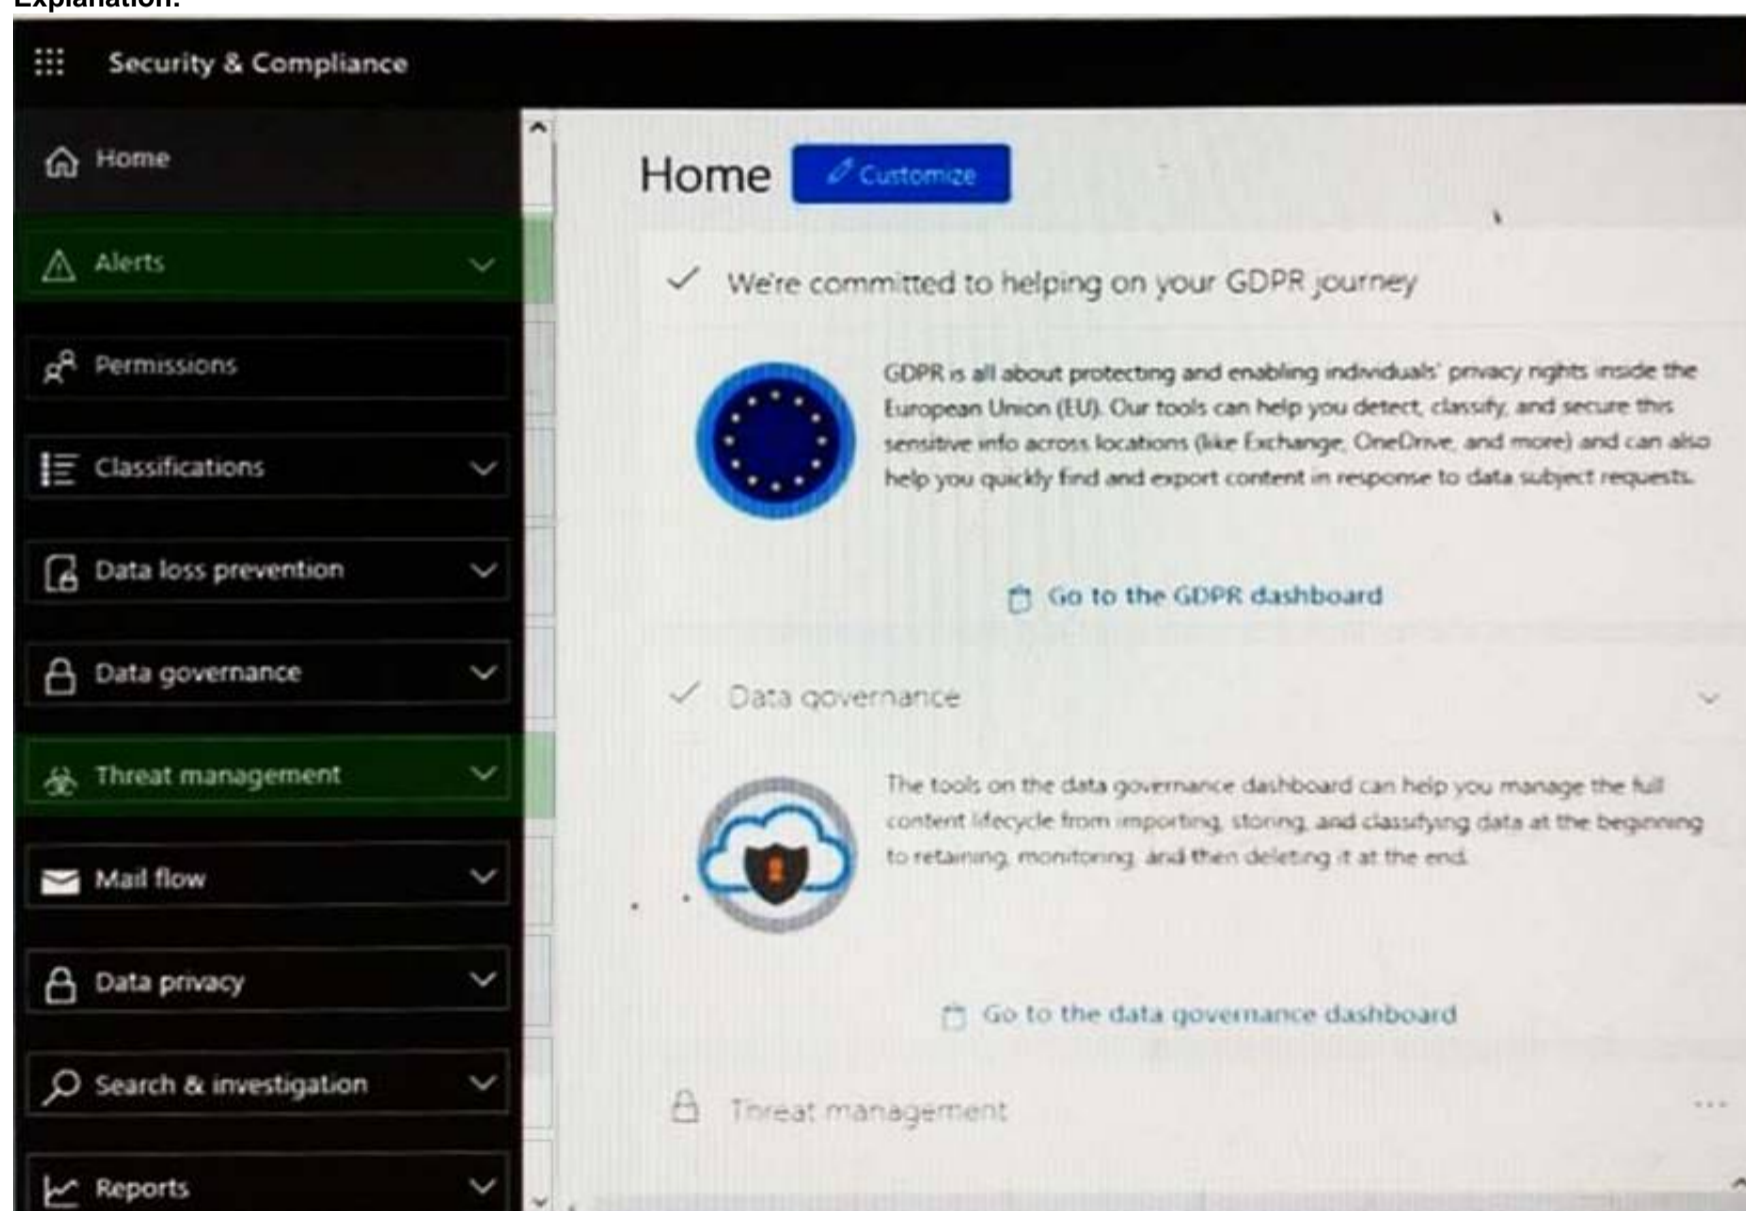

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 73
 - (Exam Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 has a retention policy to delete Inbox messages after 30 days. User1 is going on extended leave and requires that the Inbox messages be retained during the user's absence. You need to temporarily suspend the processing of the Inbox messages for User1.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

	"User1"	
Set-CASMailbox		-ECPEnabled \$true
Set-Mailbox		-ElcProcessingDisabled \$true
Set-OutlookProtectionRule		-RetentionEnabled \$true
Set-RetentionPolicy		-RetentionHoldEnabled \$true

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, Word Description automatically generated

NEW QUESTION 78

- (Exam Topic 5)

You run the following PowerShell command in a Microsoft 365 environment.

```
PS C:\WINDOWS\system32> Get-OrganizationConfig | fl *group*
```

```
DistributionGroupDefaultOU           :
DistributionGroupNameBlockedWordsList : {}
DistributionGroupNamingPolicy         :
MailTipsGroupMetricsEnabled           : True
DirectReportsGroupAutoCreationEnabled : False
GroupsCreationEnabled                  : False
HiddenMembershipGroupsCreationEnabled : False
GroupsUsageGuidelinesLink             :
DefaultGroupAccessType                 : Private
IsMIPLabelForGroupsEnabled             : False
OcmGroupId                             :
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the command.

NOTE: Each correct selection is worth one point.

[Answer choice] can view the list of members in a group	<div>▼</div> <div>Only administrators</div> <div>Only administrators and group owners</div> <div>All users</div>
[Answer choice] can view the contents of a group mailbox	<div>▼</div> <div>Only administrators</div> <div>Only administrators and group owners</div> <div>All users</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 83

- (Exam Topic 5)

Your company has a Microsoft Exchange Server 2019 organization.

The company has 10,000 mailboxes. Each department at the company has 1,000 mailboxes.

You need to ensure that when users query the global address list (GAL), they can view only the list of the users in their department. What should you create?

- A. One GAL, 10 offline address books (OABs), 10 address lists, 10 address policies (ABPs), and one email address policy
- B. 10 GALs, 10 offline address books (OABs), 10 address lists, 10 room lists, and 10 address book policies (ABPs)
- C. One GAL, 10 offline address books (OABs), 10 address lists, 10 room lists, and one address book policy (ABP)
- D. 10 GALs, 10 offline address books (OABs), 10 address lists, and 10 email address policies

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/address-books/address-lists/create-global-address-list> <https://docs.microsoft.com/en-us/exchange/address-books/address-book-policies/address-book-policies>

NEW QUESTION 85

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses a default domain named contoso.com.

Users report that email messages from a domain named fabrikam.com are identified as spam even though the messages are legitimate.

You need to prevent messages from fabrikam.com from being identified as spam. What should you do?

- A. Enable the Zero-hour auto purge (ZAP) email protection feature.
- B. Enable the safe list on a connection filter.
- C. Edit the default mail flow rule to bypass the spam filter.
- D. Modify the IP Allow list of a connection filter policy.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/configure-the-connection-filter-poli>

NEW QUESTION 90

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Security Reader role to User1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Security Administrator can view the audit reports but cannot create a message trace. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/message-trace-scc>

NEW QUESTION 92

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You create an email address policy that uses the %1s%g@fabrikam.com email address format. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-add>

NEW QUESTION 94

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Exchange Server 2019 hybrid deployment that contains two Mailbox servers named MBX1 and MBX2.

The company has the departments shown in the following table.

Name	Mailbox location	Number of recipients
Sales	MBX1	300
Production	MBX2	500
Administration	MBX1	200
IT	Exchange Online	50
Managers	Exchange Online	100
Marketing	Exchange Online	350

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups. You are informed that some sales department users send email messages that are identified as spam. You need to automatically block the sales department users from repeatedly sending spam. Solution: You run the Install-AntispamAgents.ps1 PowerShell script on the MBX1 Mailbox server. Does this meet the goal?

- A. yes
B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/antispam-and-antimalware/antispam-protection/antispam-on-mailbox>

NEW QUESTION 99

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that uses an email domain named @contoso.com. You recently purchased an email domain named fabrikam.com. You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, add the fabrikam.com email domain.
B. From the Exchange admin center, add an accepted domain for fabrikam.com.
C. From the Microsoft 365 admin center, modify the organization profile.
D. From the Exchange admin center, add a remote domain for fabrikam.com.
E. From the Exchange Management Shell, create a script that runs the Set-Mailbox cmdlet.

Answer: AE

Explanation:

A: the first step is to add the Fabrikam.com domain to Microsoft 365. You would also need to verify the domain (verify that you own the domain).

E: create a script that runs the Set-Mailbox cmdlet to add an @fabrikam.com email address to each mailbox.

NEW QUESTION 101

- (Exam Topic 5)

All the users in your company have Microsoft 365 mailboxes.

Each user connects to Microsoft Exchange Online and OneDrive for Business from a personal computer that runs Windows 10.

You need to ensure that the users can save attachments to OneDrive for Business only when they connect to their mailbox from Outlook on the web.

What should you create?

- A. an app protection policy in Microsoft Endpoint Manager
B. a device compliance policy in Microsoft Endpoint Manager
C. an Outlook Web App policy in Exchange Online
D. an Exchange ActiveSync device access rule

Answer: C

Explanation:

<https://www.pelegit.co.il/prevent-downloading-attachments-through-owa/>

NEW QUESTION 104

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You have the Address Book Policies (ABP) and address lists in the following table.

Name	Global address list	Offline address book	Address list
ABP1	GAL_1	OAB_1	List 1
ABP2	GAL_2	Default Offline Address Book	List 2

You have the users in the following table.

Name	Global address list	Address List
User1	GAL_1	List 1
User2	GAL_2	List 2
User3	GAL_2	none

You assign ABP1 to User1 and User2.

User3 is NOT assigned to an Address Book Policy.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can view the membership of List 2	<input type="radio"/>	<input type="radio"/>
User2 can only view the membership of GAL_2	<input type="radio"/>	<input type="radio"/>
User3 can view the membership of List 1	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/address-book-policies/address-b>

NEW QUESTION 106

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.

A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.

You need to configure the deployment to meet the security policy requirement.

Solution: From the Exchange organization, you create a data loss prevention (DLP) policy. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/data-loss-prevention-policies?view=o365-worldwid>

NEW QUESTION 108

- (Exam Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization.

Several users hosted in Microsoft 365 report that when they send email messages to mailboxes hosted in Exchange Server 2019, the messages fail to be delivered.

You need to examine the non-delivery reports (NDRs) sent to the Microsoft 365 mailboxes.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From an on-premises Exchange server, use the transport logs.
- B. From an on-premises Exchange server, use the SMTP logs.
- C. From the on-premises Exchange admin center, use a message trace.
- D. From the Exchange admin center, use a message trace.
- E. From the Exchange Management Shell, run the Get-Queue cmdlet.

Answer: CD

Explanation:

<https://docs.microsoft.com/en-us/exchange/monitoring/trace-an-email-message/message-trace-faq>

NEW QUESTION 111

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. All Mailbox servers and domain controllers are in the same site. You deploy an Edge Transport server. You need to ensure that all SMTP traffic between the on-premises organization and Exchange Online is routed through the Edge Transport server. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

On a Mailbox server, modify the accepted domains.

Copy the Edge Subscription file to a Mailbox server.

On the Edge Transport server, run `New-EdgeSubscription`.

On a Mailbox server, run `New-EdgeSubscription`.

Run the Microsoft Office 365 Hybrid Configuration wizard.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

`New-EdgeSubscription -FileName "c:\EdgeServerSubscription.xml"` This example creates the Edge Subscription file. It should be run on your Edge Transport server. `New-EdgeSubscription -FileData ([byte[]](Get-Content -Path "C:\EdgeServerSubscription.xml" -Encoding Byte -ReadCount 0)) -Site "Default-First-Site-Name"` This example also imports the Edge Subscription file generated in Example 1 to the Active Directory site Default-First-Site-Name; however, the end result is accomplished using one command. You must run this command on the Mailbox server. ref. <https://docs.microsoft.com/en-us/powershell/module/exchange/mail-flow/new-edgesubscription?view=exchange>

NEW QUESTION 116

- (Exam Topic 5)

You have a Microsoft Exchange Online subscription.

You need to generate a CSV file containing all the email messages that failed to send from the user1@contoso.com email address during the last 30 days.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From Exchange Online PowerShell, run the `Get-MessageTrace` cmdlet.
- B. From the Exchange admin center, run a message trace.
- C. From the Security & Compliance admin center, export the mailbox audit logs.
- D. From Exchange Online PowerShell, run the `Get-MessagetraceDetail` cmdlet.
- E. From the Security & Compliance admin center, run a message trace.

Answer: BD

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/monitoring/trace-an-email-message/run-a-message-trace-andview-re> <https://docs.microsoft.com/en-us/powershell/module/exchange/mail-flow/get-messagetracedetail?view=exchang>

NEW QUESTION 117

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Security administrator role to User1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Security Administrator can view the audit reports but cannot create a message trace.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/message-trace-scc>

NEW QUESTION 119

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Reports reader role to User1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 123

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization. You need to import an Edge Subscription on a Mailbox server. Which cmdlet should you run?

- A. New-EdgeSubscription
- B. Start-EdgeSynchronization
- C. Set-EdgeSubscription
- D. Set-TransportAgent

Answer: A

NEW QUESTION 127

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that uses an email domain named contoso.com.

An in-caning email messages route through an third-party filtering service named Filter1 to connector named Connector'.

You discover that incoming messages contain headers that specify the source IP address as Filter1.

You to ensure that incoming email messages contain headers that specify source IP address of the original sender. The solution must prevent any charges to the service.

What should you do?

- A. From Microsoft 365 Defender portal configure enhanced filtering for Connector1.
- B. Configure Connector' to authenticate messages by using the IP address of Filter' service.
- C. Configure the MX Of contoso.com to point to contoso-can.mailgotection.outbok.com.
- D. From the Exchange admin cente
- E. create a transport rule to rewrite header for incoming messages.

Answer: C

NEW QUESTION 130

- (Exam Topic 5)

Your company named ADatum Corporation has a Microsoft Exchange Online subscription that contains the sharing policies shown in the following table.

Name	Domain	Enabled	Default
Policy1	{Anonymous:CalendarSharingFreeBusySimple, fabrikam.com:CalendarSharingFreeBusyReviewer, ContactsSharing}	True	True
Policy2	{contoso.com:CalendarSharingFreeBusyDetail}	True	False
Policy3	{litware.com:CalendarSharingFreeBusyReviewer}	True	False

The subscription contains the mailboxes shown in the following table.

Name	Sharing policy
User1	Policy1
User2	Policy2
User3	Policy3

ADatum does business with the partner companies shown in the following table.

Name	SMTP domain	Email platform
Fabrikam, Inc.	Fabrikam.com	On-premises Exchange Server 2019
Contoso, Ltd.	Contoso.com	Third-party email server
Litware, Inc.	Litware.com	Exchange Online

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 133

- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft 365 subscription.
Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.
Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.
You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.
Solution: You create a new safe links policy and apply the policy to finance department users. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-safe-links-policies?view=o3>

NEW QUESTION 134

- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft Exchange Online tenant that contains 1,000 mailboxes.
All the users in the sales department at your company are in a group named Sales.
The company is implementing a new policy to restrict the use of email attachments for the users in the Sales group.
You need to prevent all email messages that contain attachments from being delivered to the users in the Sales group.
Solution: You configure a mailbox quota. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Create a mail flow rule. Reference:

<https://docs.microsoft.com/en-us/exchange/security-and-compliance/mail-flow-rules/common-attachmentblocki-scenarios>

NEW QUESTION 136

- (Exam Topic 5)

You have an address book policy named Contoso-US that contains an address list named Contoso-Finance. You need to add an address list named Contoso-Marketing to Contoso-US without removing Contoso-Finance. How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

<div><div></div><div>New-AddressList</div><div>Set-AddressList</div><div>New-AddressBookPolicy</div><div>Set-AddressBookPolicy</div></div>	-Identity	<div><div></div><div>"Contoso-Marketing"</div><div>"Contoso-Marketing", "Contoso-Finance"</div><div>"Contoso-Finance"</div><div>"Contoso-US"</div></div>
<div><div>-AddressLists</div><div><div></div><div>"Contoso-Marketing"</div><div>"Contoso-Marketing", "Contoso-Finance"</div><div>"Contoso-Finance"</div><div>"Contoso-US"</div></div></div>		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/address-books/address-book-policies/change-the-settings-of-an-addr>

NEW QUESTION 139

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains a user named User1.

User1 reports that she cannot configure a mail profile in Microsoft Outlook for Windows.

User1 receives the following error message: "Encrypted connection to your mail server is not available." You verify that User1 is assigned a Microsoft Office 365 Enterprise F3 license and can send email messages from her account by using Outlook on the web.

You need to ensure that User1 can connect to Outlook successfully. What should you do?

- A. Run the Microsoft Support and Recovery Assistant for Office 365.
- B. Activate the installation of Office 365 ProPlus.
- C. Modify the license assigned to User1.
- D. Install a new certificate on the computer of User1.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/outlook-issues/encrypted-connection-unavailable>

NEW QUESTION 144

- (Exam Topic 5)

You have a Microsoft Exchange Online subscription.

You need to prevent all Android devices from using Exchange ActiveSync to sync email. Other devices must be allowed to sync email by using Exchange ActiveSync.

What should you use?

- A. data loss prevention (DLP) policies
- B. Exchange ActiveSync access settings
- C. device access rules
- D. mobile device mailbox policies

Answer: C

NEW QUESTION 148

- (Exam Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment. The company has a finance department.

You need to move all the on-premises mailboxes of the finance department to Exchange Online. The bulk of the move operation must occur during a weekend when the company's Internet traffic is lowest. The move must then be finalized the following Monday. The solution must minimize disruption to end users.

What should you do first?

- A. Schedule a task that runs the New-MoveRequest cmdlet and specifies the Remote parameter
- B. Create a batch migration and clear the Automatically complete the migration batch check box
- C. Run the New-MigrationBatch cmdlet and specify the MoveOptions parameter
- D. Create a batch migration and select the Automatically complete the migration batch check box

Answer: C

NEW QUESTION 153

- (Exam Topic 5)

SIMULATION

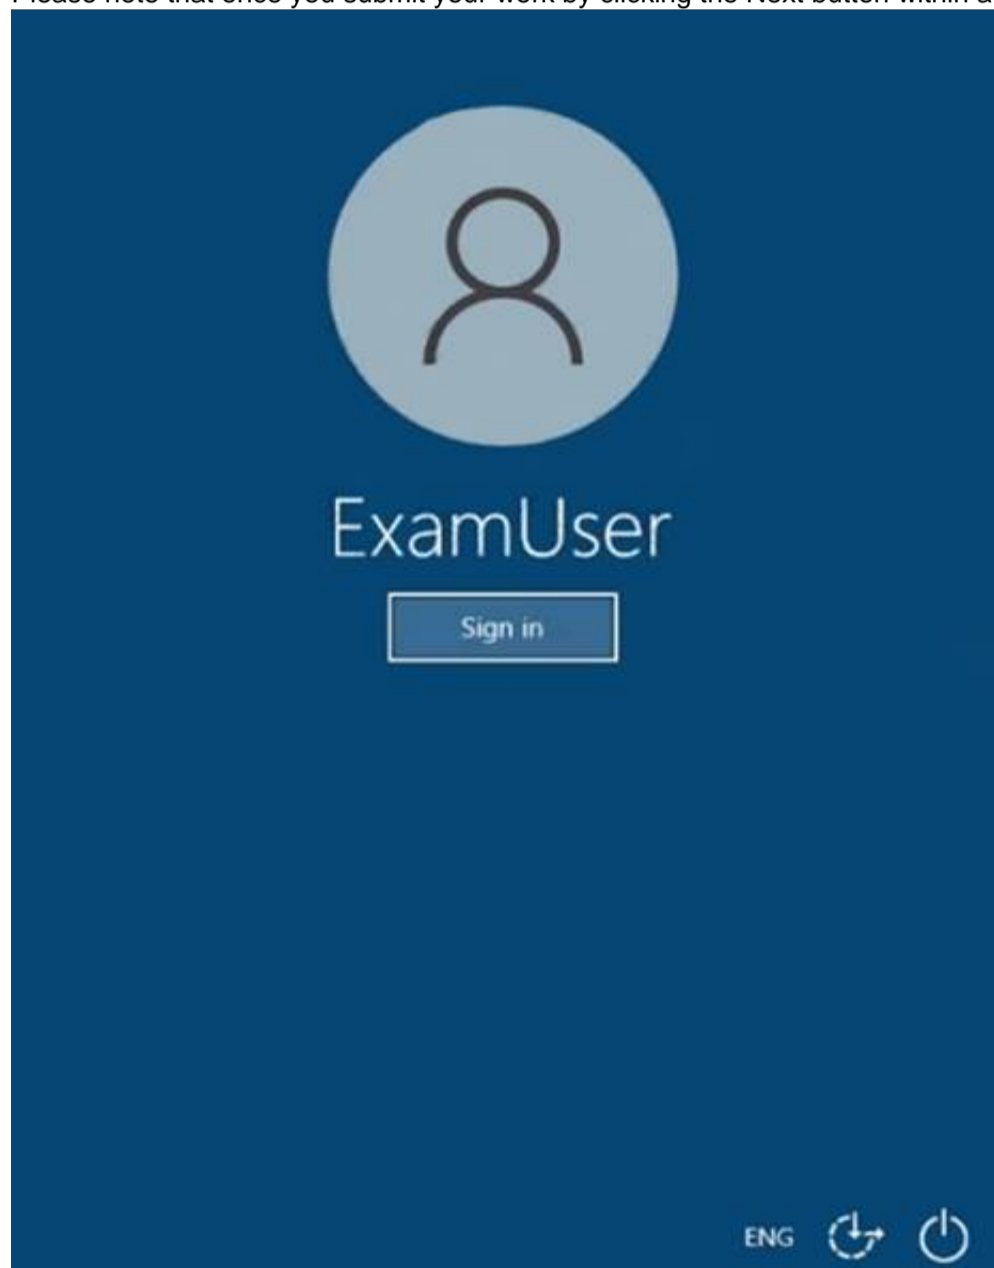

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that all email sent or received by a user named Diego Siciliani is preserved in Exchange Online. The solution must prevent Diego Siciliani from permanently deleting any email messages for 180 days.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need configure a Retention Policy. You could also use a Litigation Hold but Retention Policies are replacing Litigation Holds in future, so a Retention Policy is the way to go.

- In the Microsoft 365 Compliance Center, go to the Policies section and click Retention.
- Click the New retention policy link.
- Enter a name for the policy (such as "Diego Siciliani Email Retention") and click Next.
- In the retention period, enter 180 days and click Next.
- Ensure that only Exchange email is selected. SharePoint sites, OneDrive accounts and Office 365 groups are also selected by default so you may need to deselect them.
- Click the Choose recipients link for Exchange email.
- Click the Choose recipients button to open a list of recipients.
- Select Admin1 and click the Choose button then click the Done button.
- Click Next.
- Click the Create this policy button.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/retention-policies>

NEW QUESTION 157

- (Exam Topic 5)

Your company has an Exchange Server 2019 organization that has servers deployed in two Active Directory forests named adatum.com and contoso.com. The organization contains five Mailbox servers and two Edge Transport servers. You deploy Microsoft 365 and configure Exchange Online.

You plan to configure hybrid mail transport.

You need to identify the number of third-party CA certificates that must be used in the deployment. What is the minimum number of certificates?

- A. 1
- B. 2
- C. 4
- D. 5

Answer: A

NEW QUESTION 158

- (Exam Topic 5)

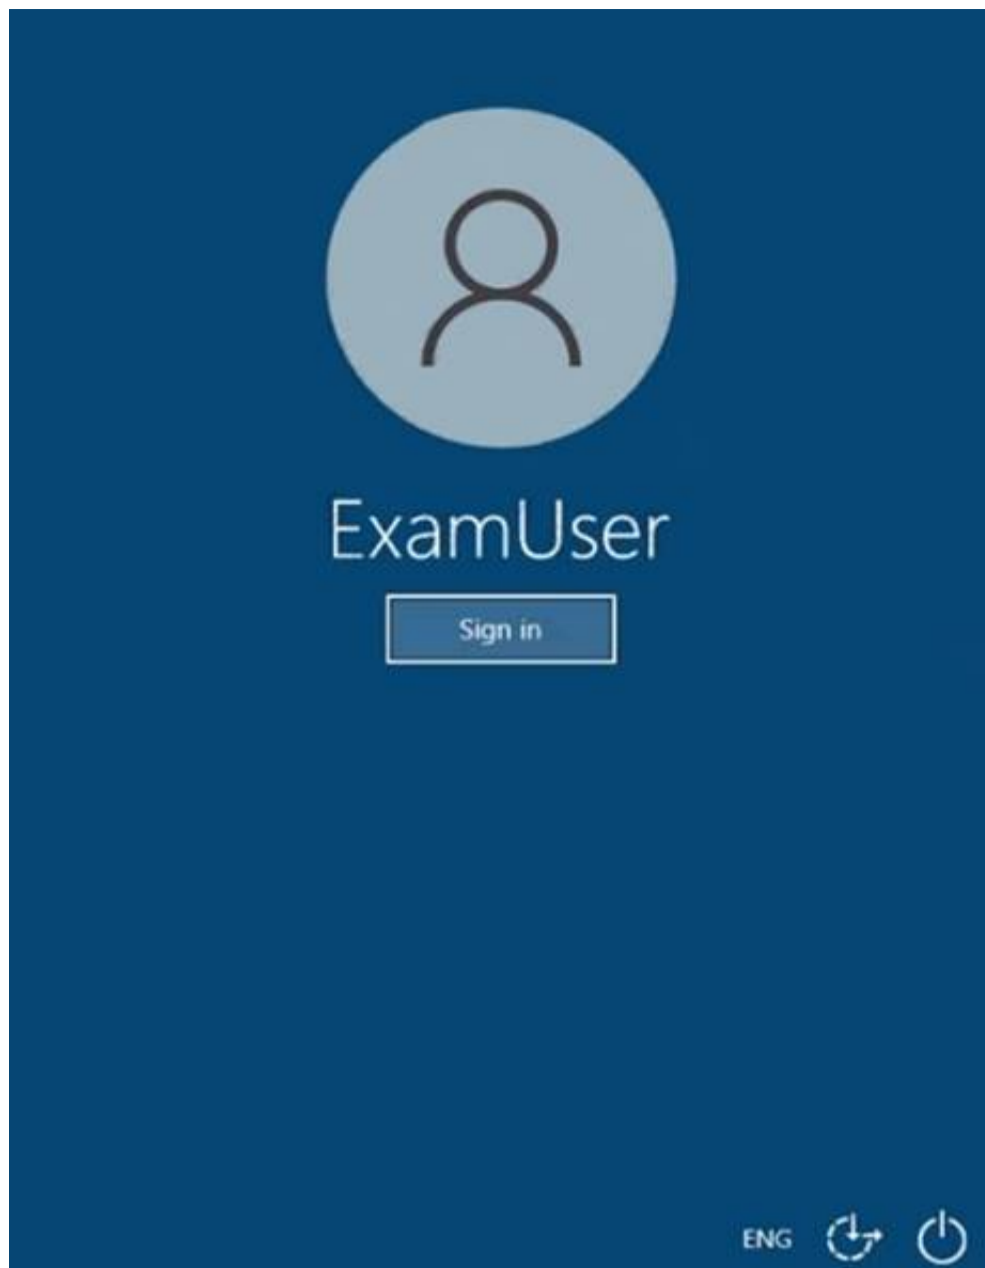

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. The following information is for technical support purposes only.

Lab Instance: XXXXXX

Two users named Christie Cline and Irvyn Sayers leave your company.

You need to ensure that all email sent to the users at your company are forwarded automatically to the mailbox of Megan Bowen. The solution must NOT use mail flow rules.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- In the EAC, go to Recipients
- >Mailboxes.
- In the list of user mailboxes, click or tap the mailbox that you want to configure mail forwarding for, and then click or tap Edit
- On the mailbox properties page, click Mailbox Features.
- Under Mail Flow, select View details

to view or change the setting for forwarding email messages.

On this page, you can set the maximum number of recipients that the user can send a message to. For

on-premises Exchange organizations, the recipient limit is unlimited. For Exchange Online organizations, the limit is 500 recipients.

- Check the Enable forwarding
- check box, and then click or tap Browse.

- On the Select Recipient
- page, select a user you want to forward all email to. Select the deliver message to both forwarding address and mailbox check box if you want both the recipient and the forwarding email address to get copies of the emails sent. Click or tap OK, and then click or tap Save.

NEW QUESTION 161

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant.

You need to import PST files from a legacy archiving solution to Exchange Online. You will import the PST files over the internet.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Use Azure Storage Explorer to upload the PST files.

Create a mapping file.

Start the PST import job.

Use AzCopy to upload the PST files.

Create a PST import job.

Retrieve the shared access signature (SAS) URL.

- A. Mastered
B. Not Mastered

Answer: A

<https://thevaliantway.com/2019/01/encrypting-email-office-365-azure-information-protection/>

NEW QUESTION 165

- (Exam Topic 5)

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.

Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application.

You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application.

What should you do?

- A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.
B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.
C. Convert the service account mailboxes into shared mailboxes.
D. Convert the service account mailboxes into mail-enabled users.

Answer: C

NEW QUESTION 168

- (Exam Topic 5)

SIMULATION

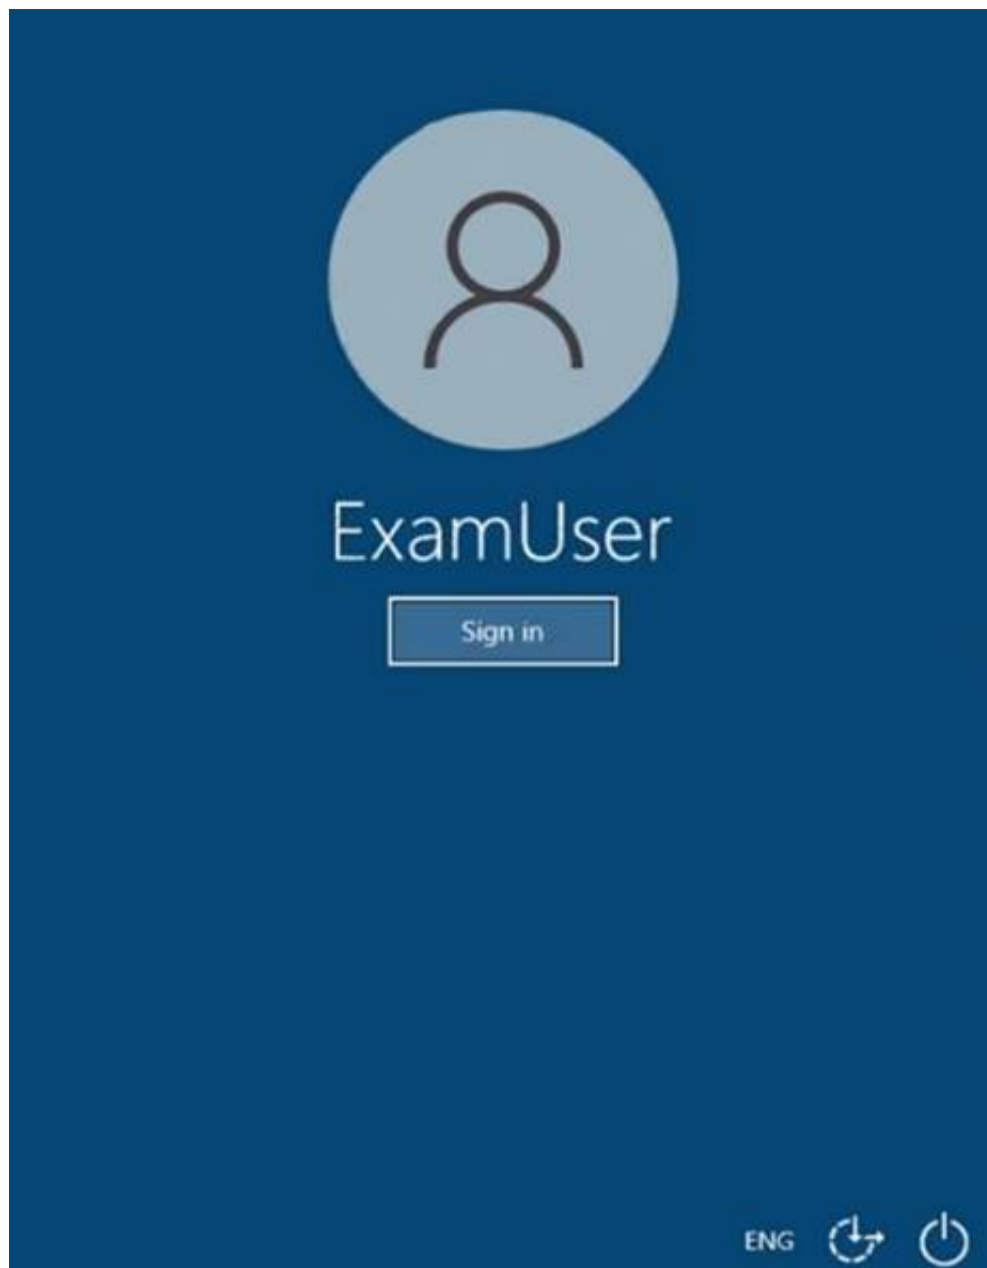

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to create a public folder named Finance in your Microsoft 365 tenant. Users must be able to send emails to Finance by using an email address of finance@lab.CloudCredential(1).TenantName.

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Use the EAC to create a public folder mailbox

➤ In the EAC, go to Public folders

➤ In the New public folder mailbox

>Public folder mailboxes, and then click Add +. page that opens, enter the following information:

- Name: Enter the name for the public folder mailbox.

- Organizational unit: Click Browse created.

- Mailbox database: Click Browse

When you're finished, click Save.

to select the location in Active Directory where the mailbox object is to select the mailbox database where the mailbox is created.

Use the EAC to create a public folder

When using the EAC to create a public folder, you'll only be able to set the name and the path of the public folder. To configure additional settings, you'll need to edit the public folder after it's created.

➤ Navigate to Public folders

>Public folders.

➤ If you want to create this public folder as a child of an existing public folder, click the existing public folder in the list view. If you want to create a top-level public folder, skip this step.

➤ Click Add +.

➤ In Public Folder, type the name of the public folder.

➤ In the Path

box, verify the path to the public folder. If this isn't the desired path, clickCancel and

follow Step 2 of this procedure.

➤ Click Save.

➤ Navigate back to Public folders

>Public folders.

- > In the list view, select the public folder that you want to mail-enable or mail-disable.
- > In the details pane, under Mail settings, click Enable

oDr isable.

- > A warning box displays asking if you're sure you want to enable or disable email for the public folder.

Click Yes

Reference:

to continue.

NEW QUESTION 173

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant.

A user named User1 has an Exchange Online mailbox. User1 leaves your company.

You need to configure the user account of User1 to meet the following requirements:

- > The Microsoft 365 license assigned to User1 must be available for another user.
- > Manager1 must be able to manage all the contents in the mailbox of User1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- From the Azure Active Directory admin center, delete the account of User1.
- From the Azure Active Directory admin center, disable the account of User1.
- From the Microsoft 365 admin center, remove the license from User1.
- From the Security & Compliance admin center, place the mailbox of User1 on In-Place Hold.
- From the Exchange admin center, delete the mailbox of User1.
- From the Exchange admin center, grant Manager1 the Full Access permission to the mailbox of User1.
- From the Exchange admin center, convert the mailbox of User1 into a shared mailbox.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Actions

Answer Area

- From the Azure Active Directory admin center, delete the account of User1.
- From the Azure Active Directory admin center, disable the account of User1.
- From the Microsoft 365 admin center, remove the license from User1.
- From the Security & Compliance admin center, place the mailbox of User1 on In-Place Hold.
- From the Exchange admin center, delete the mailbox of User1.
- From the Exchange admin center, grant Manager1 the Full Access permission to the mailbox of User1.
- From the Exchange admin center, convert the mailbox of User1 into a shared mailbox.

- From the Exchange admin center, convert the mailbox of User1 into a shared mailbox.
- From the Exchange admin center, grant Manager1 the Full Access permission to the mailbox of User1.
- From the Microsoft 365 admin center, remove the license from User1.

NEW QUESTION 178

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant. All users have Exchange Online mailboxes.

Your company has 10 projectors that are used by 30 managers.

You need to recommend a solution to manage the availability and scheduling of the projectors. The solution must NOT require additional Microsoft 365 licenses.

What Exchange Online object should you recommend creating for each projector?

- A. a public folder
- B. a distribution list
- C. a user mailbox
- D. a resource mailbox

Answer: D

Explanation:

Resource mailboxes are for the scheduling of resources such as projectors. They do not require a license. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/manage/room-and-equipment-mailboxes?view=o365-wo>

NEW QUESTION 180

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You modify the Global settings Safe Links policy. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

NEW QUESTION 186

- (Exam Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

Users in the advertising department and the editorial department of the company have mailboxes in Exchange Online.

A company policy requires that the advertising department users and the editorial department users be segmented based on the following requirements:

- > (GAL).
- > The editorial department users must not see the advertising department users in the GAL.
- > The editorial department users must be treated as external recipients of the advertising department users.
- > The advertising department users must be treated as external recipients of the editorial department users.

You need to recommend a solution that meets the requirements and minimize costs and effort. What should you recommend?

- A. In the Exchange Online tenant, create separate address book policies (ABPs) for the advertising and editorial departments.
- B. Migrate all the mailboxes of the advertising department to the on-premises organization, and then enable address book policy (ABP) routing.
- C. Purchase an additional Microsoft 365 subscription, and then migrate all the mailboxes of the advertising department to the new subscription.
- D. Create two address book policies (ABPs) in Exchange Online, and then enable ABP routing for the Exchange Online tenant.

Answer: D

Explanation:

References:

NEW QUESTION 199

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant named contoso.com.

Email messages from a remote domain named fabrikam.com are received from a server that uses a wildcard certificate for fabrikam.com and are encrypted by using TLS.

Fabrikam.com is switching to a third-party cloud filtering service for inbound and outbound email. The IP address used by the third-party service is 131.107.200.10.

You need to reconfigure the connector to only accept messages from fabrikam.com that are encrypted and received from the third-party service.

Which two settings should you modify for the connector? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Edit Connector

What security restrictions do you want to apply?

☒ Reject email messages if they aren't sent over TLS.

☒ And require that the subject name on the certificate that the partner uses to authenticate with Office 365 matches this domain name

*.fabrikam.com

☒ Reject email messages if they aren't sent from within this IP address range

+ -

NEW QUESTION 200

- (Exam Topic 5)

You need to create an address list that contains all the users who have a title of Director.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

	▼
New-AddressList	
New-AddressBookPolicy	
New-DistributionList	
New-GlobalAddressList	

-Name "Directors"

	▼
-RecipientFilter	
-SearchBase	
-SearchScope	
-Where-Object	

```
{{(RecipientType -eq 'UserMailbox') -and (Title -eq 'Director')}}}
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/powershell/module/exchange/email-addresses-and-address-books/new-address>

NEW QUESTION 205

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You plan to migrate to Exchange Online incrementally during a 12-month period.

You need to ensure that during the migration, the following features continue to work for all users:

- > Free/Busy synchronization
- > Microsoft Teams calendar integration
- > The Microsoft Outlook mobile app for Android

Which hybrid configuration should you implement?

- A. Modern Hybrid Configuration
- B. Minimal Hybrid Configuration
- C. Classic Hybrid

Answer: C

Explanation:

Reference:

<https://www.enowsoftware.com/solutions-engine/what-are-your-exchange-hybrid-options>

NEW QUESTION 207

- (Exam Topic 5)

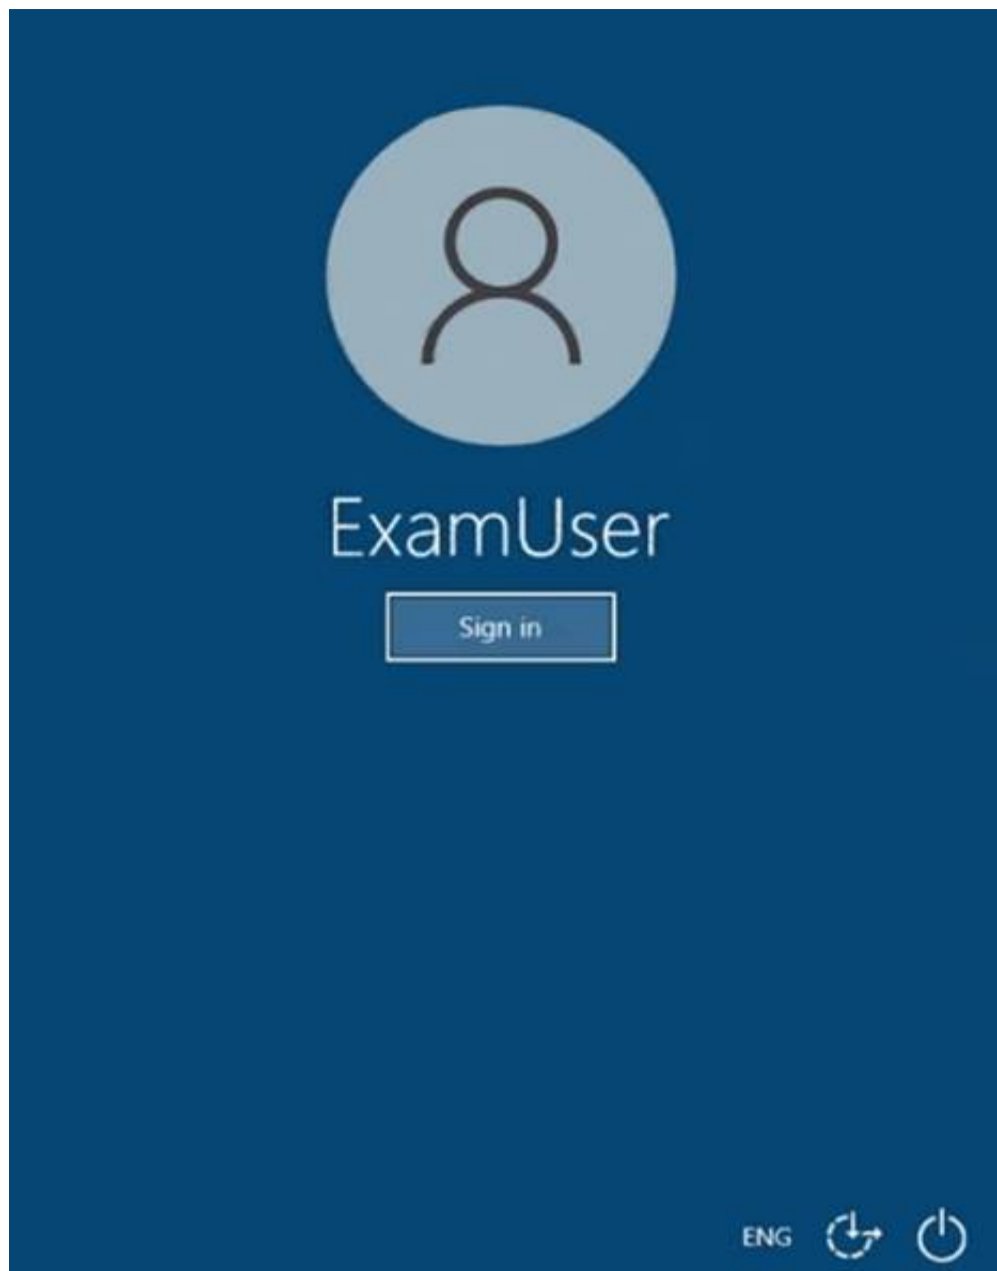

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that when emails containing an attachment that uses an .ace extension is sent to your company, the email is blocked. Each time an email is blocked, a notification must be sent to security@contoso.com.

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

or select Delete the message without notifying anyone.

If it's required, add a statement to inform users who will receive the non-delivery report (NDR) of the reason that mail delivery failed, and then select OK.

➤ Specify any additional options such as rule auditing and rule activation or deactivation time, and then select Save.

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/email-delivery/how-to-block-message-from-being-sent>

NEW QUESTION 209

- (Exam Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. You have the on-premises mailboxes shown in the following table.

Name	Forwarding address
User1	User6
User2	None
User3	None
User4	None
User5	None
User6	None

You add the mailbox permissions shown in the following table.

Mailbox	Permission
User2	Send As for User4
User4	Full Access for User3
User6	Send on Behalf for User5

You plan to migrate the mailboxes to Exchange Online by using remote mailbox move requests. The mailboxes will be migrated according to the schedule shown in the following table.

Week	Mailbox
1	User1, User2, User3, User6
2	User4, User5

Mailboxes migrated the same week will have their mailbox move requests included in the same batch and will be cut over simultaneously. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
The mail forwarding settings of the User1 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>
The permissions granted to the User4 mailbox for the User2 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>
The permissions granted to the User3 mailbox for the User4 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 211

- (Exam Topic 5)

Your network contains an Active Directory domain named fabrikam.com.

You have a Microsoft Exchange Server 2019 organization that contains two Mailbox servers. The servers are members of a database availability group (DAG).

You plan to implement an Exchange hybrid deployment.

You are evaluating the use of the Exchange Modern Hybrid connection option during the hybrid deployment. What are two benefits of using Exchange Modern Hybrid instead of Exchange Classic Hybrid? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. allows the use of Microsoft Azure Multi-Factor Authentication (MFA) for on-premises users
- B. eliminates the need to purchase publicly trusted certificates for communication between the on-premises organization and Exchange Online
- C. preserves mailbox quotas when mailboxes are moved between the on-premises organization and Exchange Online
- D. uses Organization Configuration Transfer to configure Exchange Online
- E. allows federated sharing between the on-premises organization and Exchange Online

Answer: BD

Explanation:

Reference:

<https://practical365.com/exchange-online/hybrid-exchange-making-it-easier-and-faster-to-move-to-the-cloud/>

NEW QUESTION 216

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that has Office 365 Advanced Threat Protection (ATP) enabled.

The tenant contains a user named Ben Smith who has a UPN of ben.smith@fabrikam.com. Ben Smith is protected by using an ATP anti-phishing policy.

Ben Smith reports that emails sent from his personal account of ben.smith@relecloud.com are not delivered to his work email account.

You need to ensure that personal emails are delivered to the ben.smith@fabrikam.com What should you do?

- A. Create a transport rule to assign the MS-Exchange-Organization-PhishThresholdLevel header a value of 2 for the message received from ben.smith@relecloud.com
- B. Add ben.smith@fabrikam.com as a trusted sender to the ATP anti-phishing policy.
- C. Add ben.smith@relecloud.com as a trusted sender to the ATP anti phishing.
- D. Add relecloud.com to the ATP anti-phishing list of misted domains.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/configure-atp-anti-phishing-policies>

NEW QUESTION 219

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that contains a resource mailbox named ConferenceRoom1. ConferenceRoom1 is configured as shown in the following exhibit.

ConferenceRoom1

general

booking delegates

booking options

contact information

email address

MailTip

mailbox delegation

Booking requests:

☒ Use customized setting to accept or decline booking requests

☐ Accept or decline booking requests automatically

☐ Select delegates who can accept or decline booking requests

Delegates:

+ -

User4

Save

Cancel

You need to review the customized setting for booking requests. Which cmdlet should you run?

- A. Get-ResourceConfig
- B. Get-Mailbox
- C. Get-MailboxCalendarFolder
- D. Get-CalendarProcessing

Answer: D

Explanation:

NEW QUESTION 231

- (Exam Topic 5)
You have a Microsoft Exchange Server 2019 organization.
You need to identify which accounts in Active Directory are assigned permissions to dismount mailbox databases.
How should you complete the command? To answer, drag the appropriate values to the correct targets. Each value may he used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Values	Answer Area
<div>Get-ManagementRole</div>	\$Perms = <div></div> -Cmdlet Dismount-Database
<div>Get-ManagementRoleAssignment</div>	\$Perms foreach { <div></div> -Role \$_.Name -Delegating \$false
<div>Get-ManagementRoleEntry</div>	Format-Table -Auto Role,RoleAssigneeType,RoleAssigneeName}
<div>Get-ManagementScope</div>	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/powershell/exchange/find-exchange-cmdlet-permissions?view=exchange-ps>

NEW QUESTION 234

- (Exam Topic 5)
You have an Exchange Online tenant.
You need to ensure that the users in your company's finance department can select email messages that will be deleted automatically one year later. The solution must apply only to the finance department users.
Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Publish a label to the finance department.
- B. Create a data loss prevention (DLP) policy that uses the sensitive information type.
- C. For each mailbox in the finance department, configure the retention policy settings.
- D. Create a label that has a retention setting of one year.
- E. For each mailbox in the finance department, configure Message Delivery Restrictions.

Answer: AD

Explanation:

Create a retention label and publish it to the finance department users. Reference:
<https://docs.microsoft.com/en-us/microsoft-365/compliance/retention?view=o365-worldwide>

NEW QUESTION 236

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the –EmailAddressPolicyEnabled \$false parameter.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-add> Email address policies define the rules that create email addresses for recipients in your Exchange organization.

The basic components of an email address policy are:

Email address templates: Define the email address format for the recipients (for example

<firstname>@contoso.com or <lastname>.<firstname>@contoso.com).

Recipient filter: Specifies the recipients whose email addresses are configured by the policy.

Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy).

The EmailAddressPolicyEnabled parameter specifies whether to apply email address policies to this recipient. Valid values are:

\$true: Email address policies are applied to this recipient. This is the default value.

\$false: Email address policies aren't applied to this recipient.

NEW QUESTION 237

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365.

You need to create a new Safe Attachments policy named Policy1 that meets the following requirements:

- Immediately delivers email messages that contain attachments and replaces the attachments with placeholders
- Reattaches the attachments after scanning is complete
- Quarantines malicious attachments

Which action should you select for Policy1?

- A. Monitor
- B. Block
- C. Dynamic Delivery
- D. Replace

Answer: C

NEW QUESTION 242

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant.

You plan to filter all inbound and outbound email messages by using a third-party message hygiene solution. You need to ensure that all the email sent and received by the tenant is filtered through the message hygiene solution. The solution must ensure that only the message hygiene solution can send email to the tenant.

What should you configure for the tenant? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

DNS records:

▼

Mail exchanger (MX)
Alias (CNAME)
Host (A)
Service location (SRV)

Exchange Online configuration:

▼

One inbound connector and one Outbound connector
One inbound connector only
One Outbound connector only
One remote domain and one accepted domain

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/manage-mail-flow-using-third-party-cloud>

NEW QUESTION 245

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Exchange Server 2019 hybrid deployment that contains two Mailbox servers named MBX1 and MBX2.

The company has the departments shown in the following table.

Name	Mailbox location	Number of recipients
Sales	MBX1	300
Production	MBX2	500
Administration	MBX1	200
IT	Exchange Online	50
Managers	Exchange Online	100
Marketing	Exchange Online	350

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups. You are informed that some sales department users send email messages that are identified as spam.

You need to automatically block the sales department users from repeatedly sending spam. Solution: You migrate all the mailboxes of the sales department to Exchange Online.

Does this meet the goal?

- A. yes
 B. No

Answer: A

Explanation:

Exchange Online Protection (EOP) will scan outbound messages from Exchange Online mailboxes.

NEW QUESTION 249

- (Exam Topic 5)

You have an Exchange Online tenant that contains several hundred mailboxes.

Several users report that email messages from an SMTP domain named @fabrikam.com often fail to be delivered to their mailbox.

You need to increase the likelihood that the email messages from the @fabrikam.com are delivered successfully to the users in the tenant.

- A. From the Security & Compliance admin center, modify the anti-spam policy settings.
 B. From the Security & Compliance admin center, modify the DKIM settings.
 C. From your public DNS zones, create a Sender Policy Framework (SPF) TXT record.
 D. From the Security & Compliance admin center, create a new ATP anti-phishing policy.

Answer: A

NEW QUESTION 251

- (Exam Topic 5)

You have a Microsoft Exchange Online tenant.

You need to perform an In-Place eDiscovery search. The solution must meet the following requirements: ➤ Minimize administrative effort.

➤

Search both public folders and mailboxes.

➤ Use an In-Place Hold to place the search results on hold. What should you do in the Microsoft 365 compliance center?

- A. Search the public folders and the mailboxes in a single search, and then place the results on In-Place Hold.
- B. Search the public folders first, and then place the results on In-Place Hold.
- C. Search the mailboxes second, and then place the results on In-Place Hold.
- D. Search the public folders and the mailboxes in a single search.
- E. Once the search completes, place only the mailboxes that contain results and the public folders on In-Place Hold.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/ediscovery/search-public-folders?view=exchserver-2019>

NEW QUESTION 252

- (Exam Topic 5)

You have two mailboxes named Mailbox1 and Mailbox2 that have the ProhibitSendReceiveQuota parameter set to 50 GB. From a Microsoft Exchange Online tenant, you run the following PowerShell command.

```
PS C:\> Get-Mailbox | Select-Object Alias, RecipientTypeDetails | FT -AutoSize
```

Alias	RecipientTypeDetails
-----	-----
Mailbox1	SharedMailbox
Mailbox2	RoomMailbox

You receive the license status of each mailbox and discover the configurations shown in the following table.

Alias	SKUAssigned
Mailbox1	False
Mailbox2	False

You need to increase the quota for Mailbox1 and Mailbox2. What should you do first?

- A. Assign a license to each mailbox.
- B. Convert each mailbox into an equipment mailbox.
- C. Enable an archive for each mailbox.
- D. Place both mailboxes on retention hold.

Answer: A

Explanation:

Shared and resource mailboxes don't require a license. However, without a license, these mailboxes are limited to 50 GB. To increase the mailbox size, an E3 or E5 license must be assigned. This will increase the mailbox to 100 GB.

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/exchange-online-service-description>

NEW QUESTION 255

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains 1,000 mailboxes.

All the users in the sales department at your company are in a group named Sales.

The company is implementing a new policy to restrict the use of email attachments for the users in the Sales group.

You need to prevent all email messages that contain attachments from being delivered to the users in the Sales group.

Solution: You create a mail flow rule. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/security-and-compliance/mail-flow-rules/common-attachment-block>

NEW QUESTION 260

- (Exam Topic 5)

Your on-premises network contains a proxy server and a firewall. The proxy server is configured to inspect the contents of HTTP and HTTPS sessions to identify disallowed content. Only the proxy server can connect to the internet through the firewall.

You implement Microsoft Exchange Online.

Users report that they receive an error message when they attempt to connect to their mailbox by using Microsoft Outlook.

From the internal network, you connect to <https://outlook.office.com/mail> and discover a certificate error. You discover that the certificate error contains information

about a certificate issued by your company's internal certification authority (CA).
You need to ensure that all the users can connect successfully to their mailbox. What should you do?

- A. Install a new root CA certificate on the client computer of each user.
- B. Configure client computers to bypass the proxy server when they access https://*.microsoft.com.
- C. Disable HTTPS content inspection on the proxy server.
- D. Install a new root CA certificate on the proxy server.

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/outlook/troubleshoot/connectivity/error-when-outlook-uses-rpc-https-connects>

NEW QUESTION 261

- (Exam Topic 5)
have a Microsoft Exchange Online tenant. All mailboxes ug a suffix of
All email is routed to and from the tenant through a third-party email filtering service. You have the following network-connected
> Public IP are used via NAT when connecting to the internet.
> SMTP disabled

You to ensure that the scanners can send email to external recipients via Exchange. solution must NOT require that credentials be from the scanners

Create in Exchange:

A mail flow rule

A shared mailbox

An inbound connector

An outbound connector

On the scanner, configure the SMTP smart host as:

smtp.outlook.com

smtp.office365.com

The MX record of contoso.com

contoso-com.mail.protection.outlook.com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Create in Exchange:

A mail flow rule
