

## PL-900 Dumps

### Microsoft Power Platform Fundamentals

<https://www.certleader.com/PL-900-dumps.html>

**NEW QUESTION 1**

You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	<input type="radio"/>	<input type="radio"/>
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

When you offer your application for use by other companies through a purchase or subscription, you make your application available to customers within their own Azure tenants. This is known as creating a multi-tenant application.

Box 2: No

**NEW QUESTION 2**

You use Microsoft Flow to create a flow that automatically sends email to a project manager when project team members mark a task as complete.

Project team members are prematurely marking tasks as complete. You must add quality control into the process by sending an email to a project lead for confirmation that the task is in fact complete before sending the email to the project manager.

You need to modify the flow. Which component should you use?

- A. a process argument
- B. a condition
- C. an expression
- D. a trigger
- E. an action

**Answer:** B

**Explanation:**

Use a condition and set the action to send an email.

**NEW QUESTION 3**

You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	<input type="radio"/>	<input type="radio"/>
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	<input type="radio"/>	<input type="radio"/>
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.

Box 2: No

The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:

Windows: Microsoft Edge / Narrator macOS: Safari / VoiceOver Android: PowerApps app / Talkback iOS: PowerApps app / VoiceOver

Box 3: Yes

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

**NEW QUESTION 4**

You create a user-owned custom entity by using Common Data Service.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No  
Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.  
Box 2: Yes  
By combining conditions and actions, you can do any of the following with business rules: Set field values  
Clear field values  
Set field requirement levels Show or hide fields  
Enable or disable fields  
Validate data and show error messages  
Create business recommendations based on business intelligence.

**NEW QUESTION 5**

You need to explain the major components of the Common Data Model (CDM) and their functions. Match each term to its definition.  
Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.  
NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Purpose	Tool
Entities		
Data connectors	Helps jumpstart application development by leveraging business logic, security, and integrations.	Tool
Common Data Service	A set of records used to store data.	Tool
Common Data Model		
Microsoft Power Platform		
Workflows		

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Microsoft Power Platform  
Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.  
The Microsoft Power platform brings all your data together into a common data model. Box 2: Entities  
An entity is a set of records used to store data, similar to how a table stores data within a database.

**NEW QUESTION 6**

A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.  
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.  
You need to recommend a tool to determine software usage. What should you recommend?

- A. Microsoft Intune
- B. Azure Stream Analytics
- C. Power Platform Analytics
- D. Dynamics 365 Product Insights

Answer: C

**Explanation:**

The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

**NEW QUESTION 7**

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.  
You need to recommend a solution for the coworker. What should you recommend?

- A. Create a custom connector.
- B. Ask the outside source to send you the data once a week.
- C. Use Microsoft Flow to connect to the database.
- D. Open a ticket with Microsoft and request a new connector.

E. Use Microsoft Azure Service Bus.

**Answer:** A

**Explanation:**

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.  
Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

**NEW QUESTION 8**

A company plans to create an information portal that managers can use to view critical information about their teams. You need to recommend the type of Power BI components that the company should use. What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE. Each correct selection is worth one point.

Component types	Requirement	Answer Area
<div>Dashboard</div>		
<div>Report</div>	Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	<div>Component type</div>
	Display the top departmental goal metrics and alert users when specific thresholds targets are met.	<div>Component type</div>
	Display Sales charts that can be filtered by region.	<div>Component type</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Report  
Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Box 2: Dashboard  
Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen. Box 3: Report  
Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.  
Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

**NEW QUESTION 9**

A bank uses Power Platform apps and flows to support business processes. The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected. You need to use AI Builder to implement the solution. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area
Publish the model.		
Export data into AI Builder.		
Train the model.		
Import data into Common Data Service.		
Use the model in PowerApps or Microsoft Flow.		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model Step 3: Publish the model

The last step is to publish your model.

Step 4: Use the model in PowerApps or Microsoft Flow.

**NEW QUESTION 10**

A company uses Dynamics 365 Supply Chain Management.

You need to use Microsoft Flow to automate the process of receiving and tracking raw materials. Which type of connector should you use?

- A. Common Data Service
- B. Dynamics 365
- C. Dynamics 365 for Fin & Ops
- D. Dynamic Signal

**Answer:** A

**Explanation:**

Dynamics 365 for Finance and Operations is now being licensed as Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

You can use Common Data Service to enable the flow of data between Finance and Operations apps and Dynamics 365 Sales.

**NEW QUESTION 10**

This question requires that you evaluate the BOLD text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. one
- C. three
- D. four

**Answer:** C

**Explanation:**

Restore a canvas app to a previous version in PowerApps.

1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

Details • Share • Versions • Settings • Analytics (preview)

PowerApps keeps a version history of your apps.

VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE (?)	PUBLISHED	COMMENT
2	8/20/2018 2:24:29 PM	Firstname Lastname	3.18081.19	Live	
1	7/9/2018 10:55:48 AM	Firstname LastName	3.18071.36		<div>Restore</div> <div>Delete</div>

4. In the confirmation dialog box, click or tap Restore. A new version is added to your list.

Details • Share • Versions • Settings • Analytics (preview)

PowerApps keeps a version history of your apps.

VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE (?)	PUBLISHED	COMMENT
3	8/20/2018 2:41:30 PM	Firstname Lastname	3.18071.36		<div>Publish this version</div>
2	8/20/2018 2:24:29 PM	Firstname Lastname	3.18081.19	Live	<div>Restore</div> <div>Delete</div>
1	7/9/2018 10:55:48 AM	Firstname Lastname	3.18071.36		<div>Restore</div> <div>Delete</div>

#### NEW QUESTION 14

Users within a company use Flow for personal productivity.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Export
- B. Rename
- C. Save As
- D. Share

**Answer:** AC

#### Explanation:

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

Here's how:

Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.

#### NEW QUESTION 15

You are designing a Power Apps solution that allows users to upload a status report directly to the company Microsoft SharePoint project management site from their mobile device.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You should build a model-driven app in Power Apps.	<input type="radio"/>	<input type="radio"/>
You should build a canvas app in Power Apps.	<input type="radio"/>	<input type="radio"/>
Users must download and run the Power Apps mobile application to use the solution.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: No

Box 2: Yes

Box 3: Yes

When you create an app, or someone shares an app with you, you can run that app on Windows, iOS, Android, or in a web browser.

References:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/app-from-sharepoint> <https://docs.microsoft.com/en-us/powerapps/user/run-app-client>

**NEW QUESTION 17**

A user is creating their first canvas app in Power Apps.

The user does not know what types of controls they can include. You need to recommend solutions for the user.

Which types of controls would you recommend using in Power Apps? To answer, select the appropriate control in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Control
View the date, time, and location of upcoming internal meetings.	<div><div></div><div>Meeting-screen template</div><div>Gallery</div><div>List box</div></div>
Create a meeting request from within the app.	<div><div></div><div>Meeting-screen template</div><div>Gallery</div><div>List box</div></div>
Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.	<div><div></div><div>Image</div><div>People-screen template</div><div>Add picture</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: Gallery

A Gallery control can show multiple records from a data source, and each record can contain multiple types of data. For example, a Gallery control can show multiple contacts with each item showing contact information that includes a name, an address, and a phone number for each contact.

Box 2: Meeting-screen template

In a canvas app, add a meeting screen that lets users create and send meeting requests from their Office 365 Outlook accounts. Users can search for attendees in their org and add external email addresses. If your tenant has meeting rooms built into Outlook, users can select a location as well.

Box 3: Image

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

#### NEW QUESTION 21

A company plans to implement Power Platform apps. The company does not plan to use any development tools or plug-ins.

Which actions can you perform?

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can synchronize account names with a third-party proprietary database.	<input type="radio"/>	<input type="radio"/>
You can create invoices from orders and then send the invoices to the customer.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

#### NEW QUESTION 23

A company uses Dynamics 365 Supply Chain Management.

The company wants to build customer user interfaces that add additional functionality. You need to recommend a solution for the company.

What should you recommend?

- A. Power BI
- B. Power Apps canvas apps
- C. AI Builder
- D. Microsoft Flow

**Answer:** B

#### Explanation:

Microsoft Power Apps provides a consistent experience for building apps and extending Office 365 and Dynamics 365. Investments include enhancements on Unified Interface, support for embedding canvas apps in model-driven apps and native support of the Common Data Service for Apps.

#### NEW QUESTION 24

A company uses Dynamics 365 Supply Chain Management.

When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.

You need to implement the functionality to create Outlook tasks.

Which two features should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. Power Apps
- C. Business Events
- D. Microsoft Flow
- E. Common Data Service

**Answer:** CD

#### Explanation:

Business events in Microsoft Power Automate

Business events can be consumed in Microsoft Power Automate via the application connector. The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.

#### NEW QUESTION 28

This question requires that you evaluate the BOLD text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.  
Review the underlined text. If it makes the statement correct, select “No change is needed.” If the statement is incorrect, select the answer choice that makes the statement correct.

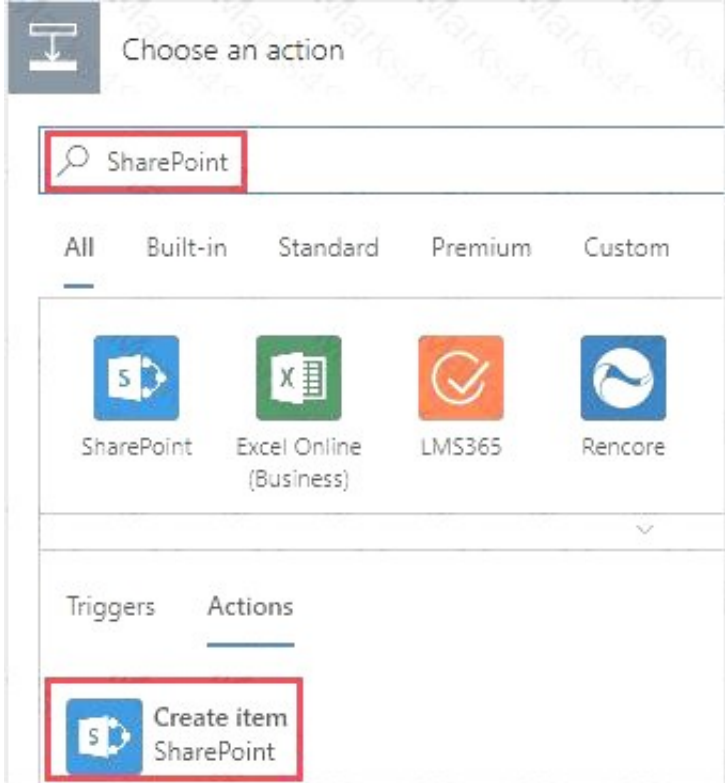

- A. No change is needed.
- B. a scheduled
- C. an instant
- D. an action

**Answer: D**

**Explanation:**

Note: Create a flow (see step 6 below)

- 1). Sign in to PowerApps.
- 2). In the left navigation bar, select Business logic, and then select Flows.
- 3). In the upper-left corner of the My Flows page, select New, and then select Create from blank.
- 4). Option to create a flow without using a template  
Near the bottom of the page that appears, select Search hundreds of connections and triggers.
- 5). In the search box, type PowerApps, and then select the PowerApps icon.
- 6). Create a PowerApps trigger
- 7). On the next page, select the PowerApps icon again, and then select New step.
- 8). In the box that says Search connectors and actions, specify an action for your flow, as in this example:

**NEW QUESTION 31**

You manage the support team at a rapidly growing company.  
Customers and support technicians need a better experience when logging and responding to support requests. You need more visibility into what the support technicians are doing every week.  
You need to recommend tools to help the company's needs.  
Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all.  
You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Power Apps		
Microsoft Flow	Customers must be able to submit support requests by using a website.	Tool
Power BI	Support requests must be created and stored.	Tool
Common Data Service	Support technicians must be notified when a new support request is entered.	Tool
	Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Tool

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Tools	Requirement	Tool
Power Apps	Customers must be able to submit support requests by using a website.	Power BI
Microsoft Flow		Common Data Service
Power BI	Support requests must be created and stored.	Microsoft Flow
Common Data Service	Support technicians must be notified when a new support request is entered.	Power Apps
	Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	

#### NEW QUESTION 33

A recent update has been made to a canvas app. The update has caused a negative impact to users. You need to roll back the app to a previous version. What should you do?

- A. Restore the previous version of the app.  
B. Uninstall the app for all users and reinstall by using the previous versions' package.  
C. Deactivate the live app, import the previous version of the app, and then activate the app.  
D. Delete the app and create a new app based on the previous version.

**Answer:** A

**Explanation:**

Restore a canvas app to a previous version in PowerApps.

Restore an app from your account

- Open powerapps.com, and then click or tap Apps in the left navigation bar.
- Near the right edge, click or tap the info icon for the app that you want to restore.
- In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

#### NEW QUESTION 36

You have a Power BI report.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input type="radio"/>
You must export data to view supporting data for a KPI.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or .csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.

Note: Export data from a Power BI dashboard

- Choose the Export data icon.
- Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.
- Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.

Box 2: No

Underlying data: Select this option if you want to see the data in the visual and additional data from the model (see chart below for details). If your visualization has an aggregate, selecting Underlying data removes the aggregate. When you select Export, Power BI exports the data to an .xlsx file and your browser prompts you to save the file. Once saved, open the file in Excel.

Box 3: Yes

A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.

Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.
