Exam Questions PL-100

Microsoft Power Platform App Maker

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

HOTSPOT - (Topic 4)
 HOTSPOT

A company uses Microsoft Teams and Microsoft 365. Employees use Microsoft Excel to create checklist and capture measurements. The company requires a Microsoft Power Platform app to consolidate the checklists and perform the measurements- Network connectivity may not be available when measurements are taken.

Which features should you use? To answer, select the appropriate options in the answer area

NOTE: Each coned selection is worth one point.

Answer Area

Requirement	Feature
App type	<ul style="list-style-type: none"> Model-driven app Canvas app Model-driven app
Data source	<ul style="list-style-type: none"> Cloud Excel table Local Excel table Cloud Excel table
Offline mode	<ul style="list-style-type: none"> Power Apps mobile Field Service Mobile Power Apps mobile Power Apps for Windows Power Apps wrap

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 3

DRAG DROP - (Topic 4)

You have a basic user security role in a test environment. You create a canvas app without customization in the environment. You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add the app to the solution.	
Export the solution.	
Send the solution to production administrators.	
Select the canvas app in the Maker portal.	
Export the package.	
Send the package to production administrators.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Add the app to the solution.	
Export the solution.	
Send the solution to production administrators.	
Select the canvas app in the Maker portal.	Select the canvas app in the Maker portal.
Export the package.	Export the package.
Send the package to production administrators.	Send the package to production administrators.

NEW QUESTION 4

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories. You are creating an app to manage requests for new products. The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings. Only two new tables should be created in Microsoft Dataverse:
 ? Products: Holds the products that can be requested.
 ? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category. You need to identify the data types to use when building the table columns in Dataverse. Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Data types	Answer Area	Data types
Lookup	Scenario Create a column in the Products table that displays the category of the product Create a column in the Products table for the product ID of the product Create a column in the Requests table that allows the user to select form a list of available products	Data type
Choice		Data type
Text		Data type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text

Text columns can contain text characters. This column type has several format options that will change the presentation of the text.

Box 2: Lookup

When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.

Box 3: Choice

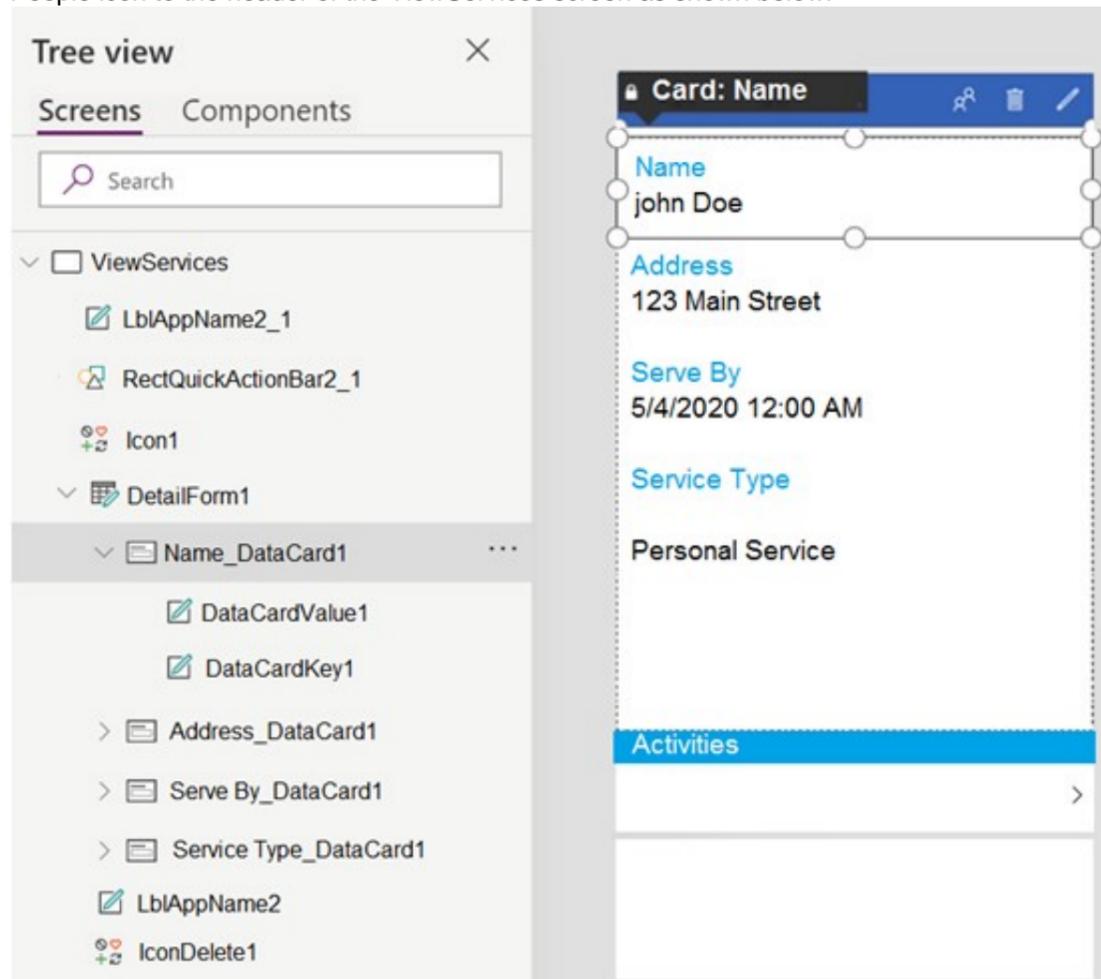

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 5

HOTSPOT - (Topic 4)

You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

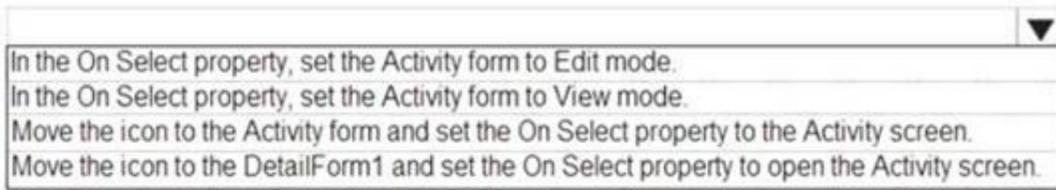

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

Which action should you perform on the People icon?

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Name_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

NEW QUESTION 6

- (Topic 4)

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
- B. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
- C. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- D. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
- E. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form to First(Accounts).Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- F. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Ne
- G. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
- H. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- I. Add a display form to Screen_AccountDetail.Set the data source of the form to Account
- J. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Answer: AD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 7

- (Topic 4)

You are an app designer for a hotel.

The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.

Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

Answer: A

Explanation:

Manage environment in the Power Platform admin center. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

NEW QUESTION 8

- (Topic 4)

You create a canvas app within a Power Platform environment.

You need to identify potential accessibility issues for the canvas app before making the app available to other users.

Which tool should you use?

- A. Portal Checker
- B. App Checker

C. Solution Checker

Answer: B

Explanation:

Find accessibility issues

* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

* 2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 9

HOTSPOT - (Topic 4)

HOTSPOT

A company is creating an app to manage project status reports.

Users will update a series of controls and click a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms.

You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable Collection Context variable Global variable Lookups
Separate the calculate action from the previous screen.	: . : -
Go to the next page.	Navigate() Navigate() Revert() NewForm() SetFocus()

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable
Separate the calculate action from the previous screen.	:
Go to the next page.	Navigate()

NEW QUESTION 10

DRAG DROP - (Topic 4)

A company uses a canvas app.

The finance team and sales team require access to the canvas app. You must perform the following actions:

- Add members of the sales team to the app as users.
- Add members of the finance team to the app as co-owners.

The app must be shareable with current and future team members.

You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.

Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Group types	Activity	Group type
Security group	Add members of the sales team to the app as users.	Dynamic group
Distribution group	Add members of the finance team to app as co-owners.	Security group
Dynamic group		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

- (Topic 4)

You create a canvas app.

You need to make the app available to other people in your company.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Grant access to individual users in your company.
- B. Share the app with a Microsoft Exchange distribution list.
- C. Grant access to a Microsoft Teams team.
- D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:

After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it. Specify each user by name, or specify a security group in Azure Active Directory.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app>

NEW QUESTION 12

DRAG DROP - (Topic 4)

A company has the following divisions: wholesale and retail.

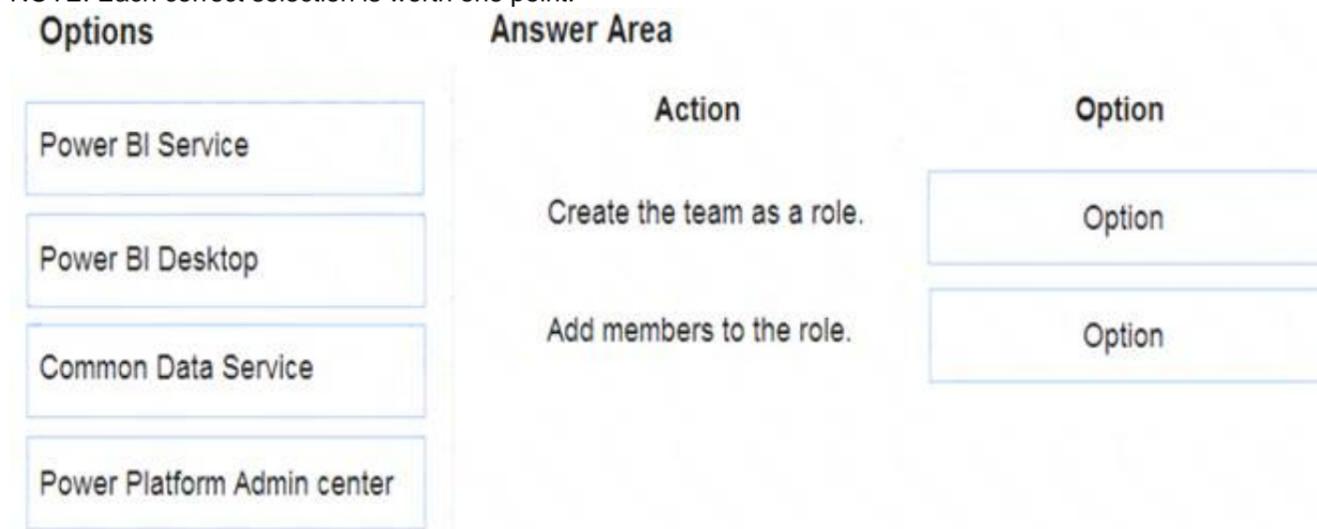

The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.

You need to ensure that each user sees data only for the team to which the user is assigned.

How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power BI Desktop

You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.

To define security roles, follow these steps.

? Import data into your Power BI Desktop report, or configure a DirectQuery connection.

? From the Modeling tab, select Manage Roles.

? From the Manage roles window, select Create.

? Etc.

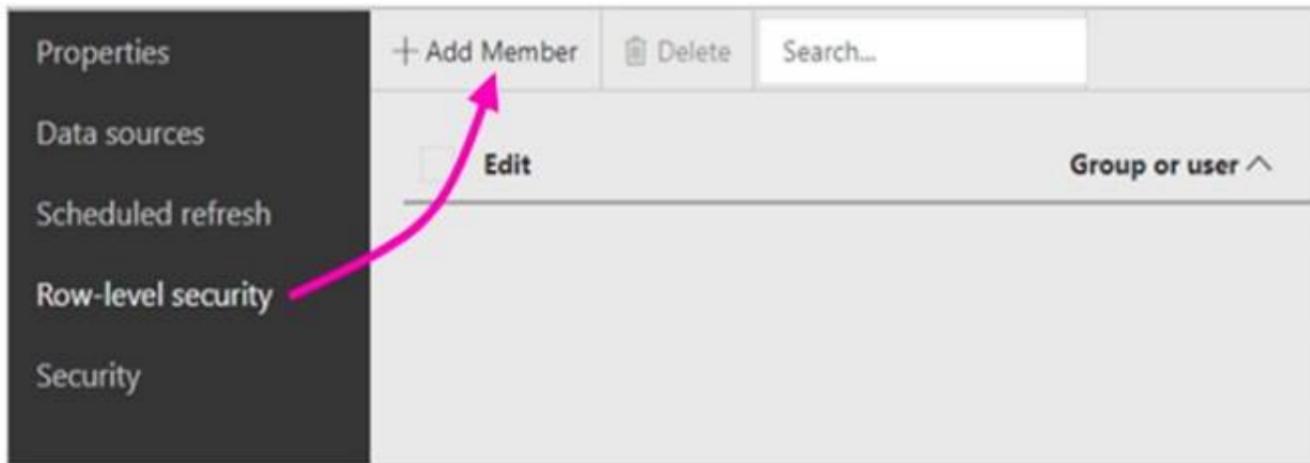

Box 2: Power BI Service

After you save your report in Power BI Report Server, you manage security and add or remove members on the server.

* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.

* 2. In Power BI Report Service, select the ellipsis (...) next to the report.

* 3. Select Manage > Row-level security.

On the Row-level security page, you add members to a role you created in Power BI Desktop.

NEW QUESTION 15

- (Topic 4)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

Answer: D

Explanation:

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

NEW QUESTION 17

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- ? Provision production environments named P1 and P2.
- ? Copy the current production environment to P1 and P2.
- ? Use P1 for development and P2 for testing.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Don't use production environment for development and testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 21

DRAG DROP - (Topic 4)

You are an app and report maker. You provide visualizations for two departments in an organization.

Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.

Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Multi-series	Unstructured answers to free text survey questions.	<input type="text"/>
Tag		
Stacked column	Real-time column chart that groups complaints by category, urgency, and status.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Tag

Box 2: Multi-series

Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 22

DRAG DROP - (Topic 4)

You have a solution that contains a Power Automate flow, an environment variable, and a

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Select the managed solution.
- Adjust the version number.
- Publish all changes.
- Select the unmanaged solution.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Adjust the version number. Step 2: Select the managed solution.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Step 3: Publish all changes.

NEW QUESTION 26

DRAG DROP - (Topic 4)

: 186 DRAG DROP

A company uses Power Apps.

The company requires a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.

Which connector types should you use? To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Connector types	Answer Area	Sources	Connector type
Standard	<div style="border: 1px solid gray; height: 100px; width: 100%;"></div>	SharePoint list	<input type="text"/>
Custom		Microsoft 365 mailbox	<input type="text"/>
		SOAP API	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 28

- (Topic 4)

You create a weekly report app as a canvas app. The data source for the app is a Microsoft SharePoint list.

The file that contains the weekly report must be attached to each submission made in the app. Employees must modify the report through the canvas app after the initial submission.

The manager must be notified by email when an employee updates the report. You need to create cloud flows.

Which SharePoint trigger should you use?

- A. When an item is created
- B. When an item or file is modified
- C. When a file is created (properties only)
- D. When a file is created in a folder

Answer: B

NEW QUESTION 31

DRAG DROP - (Topic 4)

You create a canvas app for a store.

The logo must appear as the background image for the app. A loading spinner must display on the screen as the app loads.

You need to add the features to the app.

What should you modify? To answer, drag the appropriate form areas to the correct requests. Each form area may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Screen areas	Feature request	Screen area
<div style="display: flex; gap: 10px;"> <div style="border: 1px solid black; padding: 5px; width: 60px; text-align: center;">Form</div> <div style="border: 1px solid black; padding: 5px; width: 60px; text-align: center;">Gallery</div> </div>	Add logo.	
<div style="border: 1px solid black; padding: 5px; width: 60px; text-align: center;">Screen</div>	Add loading spinner.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Screen

You can add an image to a screen in several different ways. One way is to upload an image to the app, go to the Media tab, and then click on the image to add it to a screen.

Note: Configure graphical elements in your app, including images, photos, and elements of a pen control.

BackgroundImage – The name of an image file that appears in the background of a screen. Applies to the Screen control.

Box 2: Screen

Out Of Box Canvas App, provide a property called LoadingSpinner and LoadingSpinnerColor.

LoadingSpinner property is used to displaying a Canvas App OOB Loader Image unless your screen finishes loading.

Click on the Screen in your Canvas App and then You'll be able to see LoadingSpinner and LoadingSpinnerColor Property.

NEW QUESTION 36

- (Topic 4)

You create a model-driven app for salespeople.

Users must interact with a business process flow that invokes multiple tables. You need to instruct users where to find the business process flow, which component should you use?

- A. form
- B. command bar
- C. dashboard
- D. site map

Answer: D

NEW QUESTION 37

HOTSPOT - (Topic 4)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model- driven app.

You need to ensure all users can see the tiles.
 What should you do? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">▼</div> <div style="padding: 2px;">Power Platform Environment settings</div> <div style="padding: 2px;">Power Apps settings</div> <div style="padding: 2px;">Power BI Service settings</div> <div style="padding: 2px;">Power BI Desktop settings</div> </div>
Add tiles to a dashboard.	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">▼</div> <div style="padding: 2px;">Create a personal dashboard</div> <div style="padding: 2px;">Create a Power BI dashboard.</div> <div style="padding: 2px;">Create a system dashboard.</div> </div>
Allow users to view tiles.	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">▼</div> <div style="padding: 2px;">Share tile and share dashboard.</div> <div style="padding: 2px;">Share report and share dashboard.</div> <div style="padding: 2px;">Share tile and publish dashboard.</div> <div style="padding: 2px;">Share report and publish dashboard.</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

? In the Power Platform admin center, select an environment.

? Select Settings > Product > Features.

? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.

? Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

? Open your app and go to Dashboards.

? Select an existing personal dashboard or select New to create one.

? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.

? Add new Power BI tile.

? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.

? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.

? Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must

same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

NEW QUESTION 41

- (Topic 4)

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business process flow
- C. Power BI Desktop
- D. Data gateway

Answer: AD

Explanation:

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services. Can use the Power Platform dataflows to load entity in CDS with the option to transform data.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem> <https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplatform-dataflows-in-power-apps/>

NEW QUESTION 42

DRAG DROP - (Topic 4)

You create an expense claim app for a manufacturing company. Employees use the app to enter details of their expenses and upload receipts.

The company has an on-premises finance system with no APIs.
 The company requires an automation to enable the manager to approve employee claim requests when they are submitted.
 After a claim request is approved, the expense details must be entered in the on-premises finance system.
 You need to create the flow.
 Which flow type should you use for each requirement? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Flow types

Requirement	Flow type
Approve employee claim requests when they are submitted.	Automated flow Automated flow Scheduled flow Instant flow
Enter the expense details in the on-premises finance system.	Cloud flow Cloud flow Desktop flow Business process flow

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Flow types

Requirement	Flow type
Approve employee claim requests when they are submitted.	Automated flow
Enter the expense details in the on-premises finance system.	Cloud flow

NEW QUESTION 45

- (Topic 4)
 A company uses Power Apps and Microsoft Dataverse. The company has a managed solution in the production environment
 You make changes to the solution in the development environment. Some components are unused. The changes to the solution must be reflected in the production environment
 You need to ensure that all unused components are removed. What should you do?

- A. Create a new solution
- B. Upgrade the solution.
- C. Update the solution.
- D. Patch the solution.

Answer: B

NEW QUESTION 49

DRAG DROP - (Topic 4)
 You are designing a data model for a new app. The app will be supported by two tables. TableA will contain data that is unique to your industry. TableB will provide access to readonly data from an Azure SQL database.
 You need to configure the tables.
 Which table type should you use? To answer, drag the appropriate table types to the correct tables. Each table type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Table types	Answer Area						
Custom	<table border="1"> <thead> <tr> <th>Table</th> <th>Table type</th> </tr> </thead> <tbody> <tr> <td>TableA</td> <td></td> </tr> <tr> <td>TableB</td> <td></td> </tr> </tbody> </table>	Table	Table type	TableA		TableB	
Table		Table type					
TableA							
TableB							
Standard							
Virtual							

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table types	Answer Area						
Custom	<table border="1"> <thead> <tr> <th>Table</th> <th>Table type</th> </tr> </thead> <tbody> <tr> <td>TableA</td> <td>Custom</td> </tr> <tr> <td>TableB</td> <td>Virtual</td> </tr> </tbody> </table>	Table	Table type	TableA	Custom	TableB	Virtual
Table		Table type					
TableA		Custom					
TableB	Virtual						
Standard							
Virtual							

NEW QUESTION 50

HOTSPOT - (Topic 4)

A company uses Microsoft Dataverse to store holiday employee request data.

An HR manager needs a report that displays overview information about the employee requests.

You need to design a report that visualizes request data over time and type.

Which Microsoft Power BI functionalities should you use to complete each step? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Step	Functionality
Create additional relationships between tables	<ul style="list-style-type: none"> Model view Model view Data view Report view
Change the data type of a column	<ul style="list-style-type: none"> Data view Model view Data view Report view
Design visuals	<ul style="list-style-type: none"> Report view Model view Data view Report view
Choose data for import	<ul style="list-style-type: none"> Navigator Data view Report view Navigator

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Step	Functionality
Create additional relationships between tables	<ul style="list-style-type: none"> Model view Model view Data view Report view
Change the data type of a column	<ul style="list-style-type: none"> Data view Model view Data view Report view
Design visuals	<ul style="list-style-type: none"> Report view Model view Data view Report view
Choose data for import	<ul style="list-style-type: none"> Navigator Data view Report view Navigator

NEW QUESTION 55

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.

You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library

Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.

By creating a component library, app makers easily share and update one or more components with other makers.

Component libraries are containers of component definitions that make it easy to: Discover and search components.

Publish updates.

Notify app makers of available component updates.

Box 2: Component

A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 59

DRAG DROP - (Topic 4)

DRAG DROP

A company uses data from a publicly available web service. You plan to create a tabular report by using Power BI Desktop to visualize data from the web service. The data returned in one column is numeric and must be converted to a corresponding text

You need to create the report and make it available only to co workers.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 62

- (Topic 4)

A company plans to roll out several Power Apps apps to multiple business units across international operations.

The apps must be managed through an application lifecycle management (ALM) solution to provide a consistent and predictable use experience. All changes to the app must be traceable and documented in a single location. You must be able to revert to a previous version of an app. The app release cycles must be as streamlined as possible.

You need to create an application for the apps.

Which two tools should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Azure DevOps
- B. Microsoft Visual Studio
- C. Lifecycle Services
- D. AppSource
- E. Common Data Service

Answer: AD

Explanation:

A: DevOps is the combining of two historically disparate disciplines: software development and IT operations. The primary goal of DevOps is to shorten the software development lifecycle and provide continuous integration and continuous delivery (CI/CD) with high software quality. You can use Power Apps build tools to automate common build and deployment tasks related to Power Apps if your DevOps platform is Azure DevOps.

D: Microsoft AppSource is now embedded in the Dynamics 365 home page and throughout the common navigation. It now includes a private gallery of apps available to you within your company. Select Get more apps from the home page or task pane, and navigate to the My Organization tab to see apps that are available to you.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/devops-build-tools> <https://docs.microsoft.com/en-us/powerapps/user/app-source>

NEW QUESTION 64

HOTSPOT - (Topic 3)

You need to implement the student attendance requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Table type or ownership
Cooking class ownership	<ul style="list-style-type: none"> User owned by instructors User owned by students User owned by instructors User owned by chefs Organization owned
Student attendance	<ul style="list-style-type: none"> Appointment Task Appointment Custom activity Recurring appointment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Table type or ownership
Cooking class ownership	<ul style="list-style-type: none"> User owned by instructors User owned by students User owned by instructors User owned by chefs Organization owned
Student attendance	<ul style="list-style-type: none"> Appointment Task Appointment Custom activity Recurring appointment

NEW QUESTION 66

- (Topic 4)

You design a canvas app that has multiple screens. Each screen will have multiple button controls.

The button controls must all have the same background color. You must be able to change

You need to configure the button fill property. What should you do?

- A. Update the Fill property to a variable created by using the Navigate function.
- B. Update the Fill property to a variable created by using the Set function.
- C. Select all the buttons white holding the Ctrl key, and then change the color property.
- D. Use a background image property in place of setting a color property.

Answer: A

NEW QUESTION 71

- (Topic 3)

You need to implement reporting to support the college marketing efforts. Which type of dashboard should you use?

- A. Power BI
- B. Interactive
- C. Model-driven

Answer: A

NEW QUESTION 72

HOTSPOT - (Topic 2)

You need to resolve the issues found during testing.

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Option
Testers see all time entries.	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Hierarchical security</div> <div style="padding: 2px;">Security group</div> <div style="padding: 2px;">Security role</div> </div>
Testers are able to edit existing time entries.	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Control property</div> <div style="padding: 2px;">Field-level security</div> <div style="padding: 2px;">Security role</div> </div>
Managers cannot see required information.	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Access team template</div> <div style="padding: 2px;">Field-level security</div> <div style="padding: 2px;">Hierarchical security</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Security role

Scenario: Employees must only be able to access their own time tracking records from the app.

Testers report that they can see time entries in the Time Tracker app, not just their own.

Box 2: Field-level security

Scenario: Employees must only be able to modify time records for the current and previous day.

Testers report that they can edit any existing time entries.

Box 3: Hierarchical security

You use field security tables to apply field-level security, which restricts field access to specified users and teams.

NEW QUESTION 77

- (Topic 2)

You need to implement the change requested by the operations manager. Which control should you use?

BF70D5D

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Answer: D

Explanation:

Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 79

- (Topic 2)

You need to implement logic in the app for lost sales. What should you do?

- A. Create a business process flow.
- B. Define a business rule for the Sales Log edit form.
- C. Set the required field property of the Won/Lost field to Required.
- D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:

Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
 ? Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
 Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
 You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
 Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
 Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 82

HOTSPOT - (Topic 2)

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Feature	Setting
Create the relationship between the Job Setup and Time Tracking entities.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">1:N</div> <div style="padding: 2px;">N:N</div> <div style="padding: 2px;">Self-referential</div> </div>
Configure ownership for the Time Tracking entity.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Business-owned</div> <div style="padding: 2px;">Organization-owned</div> <div style="padding: 2px;">User or Team owned</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: 1:N

Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Box 2: User or Team owned

Scenario: Employees must only be able to access their own time tracking records from the app.

User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

NEW QUESTION 84

HOTSPOT - (Topic 2)

You need to meet the requirement for the time tracking app.

Which controls should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Rating</div> <div style="padding: 2px;">Slider</div> <div style="padding: 2px;">Timer</div> </div>
Read the employee's number into the app.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Barcode-scanner</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Image</div> <div style="padding: 2px;">Shape</div> </div>
Display a photo of an employee when the employee badge is read.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Camera</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Icon</div> <div style="padding: 2px;">Image</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Timer

A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.

Box 2: Barcode scanner

The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.

Box 3: Image

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

NEW QUESTION 88

- (Topic 2)

You need to modify the entity form to resolve the customer request number issue. What should you do?

- A. Use a calculated field
- B. Change the data type of the customer request number field to Lookup
- C. Change the data type of the customer request number field to Autonumber

Answer: C

Explanation:

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number. Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

NEW QUESTION 90

HOTSPOT - (Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in

NOTE: Each correct selection is worth one point.

Requirement	Property
Provide a visual indicator when the app is offline.	<input type="checkbox"/> Visible <input type="checkbox"/> OnSelect <input type="checkbox"/> DisplayMode <input type="checkbox"/> Fill
Store data when the app is offline.	<input type="checkbox"/> OnSelect <input type="checkbox"/> LoadData <input type="checkbox"/> SubmitForm <input type="checkbox"/> Now

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control.

NEW QUESTION 91

- (Topic 1)

You need to provide all app components of the application to Tailwind Traders. What should you do?

- A. Package the application and flow components into a single solution for export.
- B. Run the app checker and flow checker prior to publishing each component for export.
- C. Export each component separately but use the same version number for each component.
- D. Publish the application and flow solutions at the same time before exporting each one.

Answer: B

Explanation:

Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.

Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.

Reference:

<https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-includes-rules-canvas-apps-flows>

NEW QUESTION 94

HOTSPOT - (Topic 1)

You need to roll back the mobile app to an earlier version.

Requirement	Action
Identify the currently published version and view version notes.	<input type="text"/> View the session details page for the app in Power Apps Studio. View environment details for the app in the Power Admin portal. View details for the app in the Power Apps Maker portal.
Revert to an earlier version of the app.	<input type="text"/> Select Restore on the previous version of the app. Export the previous version of the app and import as a new version. Delete versions of the app until the desired version is the most recent.

What should you do? To answer, select the

appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Identify the currently published version and view version notes.	<input type="text"/> View the session details page for the app in Power Apps Studio. View environment details for the app in the Power Admin portal. View details for the app in the Power Apps Maker portal.
Revert to an earlier version of the app.	<input type="text"/> Select Restore on the previous version of the app. Export the previous version of the app and import as a new version. Delete versions of the app until the desired version is the most recent.

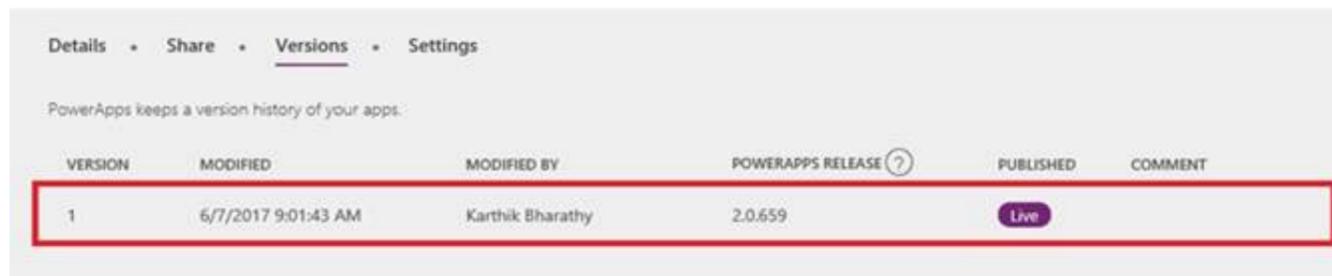

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: View the sessions details page for the app in Power Apps Studio

Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

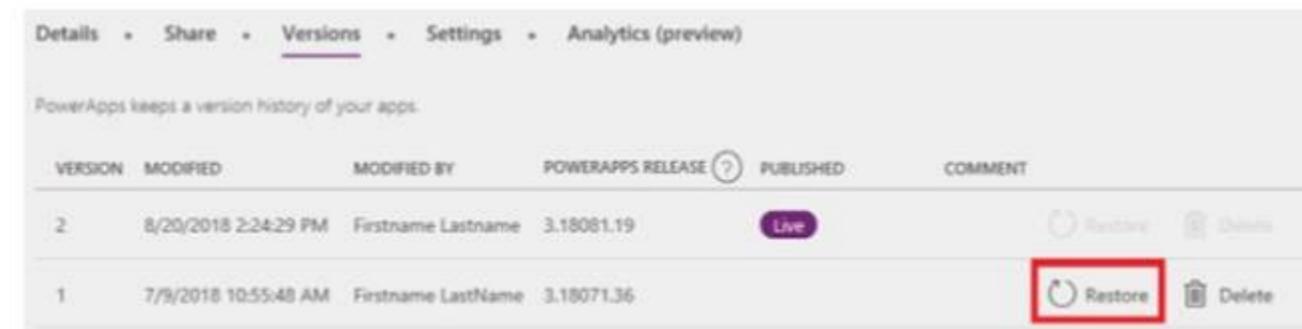

Box 2: Select Restore on the previous version of the app. Restore an app from your account

? Open powerapps.com, and then click or tap Apps in the left navigation bar.

? Near the right edge, click or tap the info icon for the app that you want to restore.

? Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

NEW QUESTION 97

DRAG DROP - (Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools

- Solution Checker
- App Checker
- Object Detector
- Preview the app

Answer Area

Requirement	Tool
Accessibility	<input type="text"/>
Deployment	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse. Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines. Use solution checker to validate your model-driven apps in Power Apps.

NEW QUESTION 100

DRAG DROP - (Topic 1)

You need to modify the app design to meet the accessibility needs of the sales associates.

Which properties should you configure? To answer, drag the appropriate properties to the correct restrictions. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Properties	Restriction	Property
TabIndex		
DisplayMode	Design for User2	<input type="text"/>
AccessibleLabel	Design for User3	<input type="text"/>
Tooltip		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: AccessibleLabel

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.

User2 is visually impaired and cannot see images. AccessibleLabel is a label for screen readers.

An empty value for Image, Icon, and Shape controls will hide the controls from screen reader users.

Box 2: TabIndex

User3 is unable to use a mouse.

TabIndex determines if the control participates in keyboard navigation.

Keyboard navigation is an important aspect of any app. For many, the keyboard is more efficient than using touch or a mouse. The navigation order should:

Mirror what is seen visually.

Only have a tab stop at controls that are interactive.

Follow either an intuitive across and then down "Z" order or a down and then across "reverse-N" order.

NEW QUESTION 102

- (Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to true
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to false
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to false
- G. Export the app as an unmanaged solution.

Answer: C

Explanation:

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 105

HOTSPOT - (Topic 1)

You need to create a flow for sending required emails to the regional manager.

How should you create the flow? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Option

Type

Flow type to use

▼
Instant
Automated
Business Process
Scheduled

Trigger to start flow

▼
HTTP Webhook
Power Apps
Common Data Service when a record is created
Office 365 Outlook Send an email

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user

interface, text, application, email Description automatically generated

Box 1: Business Process

Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.

Box 2: Common Data Service when a record is created

The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:

? When a row is created, updated, or deleted

? When an action is performed

? When a flow step is run from a business process flow

NEW QUESTION 109

- (Topic 4)

You are creating a canvas app for a company.

The app must access data from a private web service that is provided by the company. You need to set up the connector.

Which connector type should you use?

- A. Custom
- B. Standard
- C. First-party
- D. Premium

Answer: A

NEW QUESTION 113

- (Topic 4)

An automobile company uses Power Apps. The company uses a model-driven app to manage customers and repairs.

The Customer table has a custom column of type text named Best time to call. On the Repair form, employees require the Best time to call column to be displayed next to the customer name.

You need to modify the model-driven app to display the Best time to call column.

Which two steps should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add The Best time to call column to the quick view Repair form.
- B. Create a quick view form for the Repair table.
- C. Create a quick view form for the Customer table.

Answer: CD

NEW QUESTION 118

HOTSPOT - (Topic 4)

You are creating a Power Automate flow.

You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow: @or(equals(item()['color'], 'red'),contains(item()['color'],'blue')) The filter returns results only when the expression resolves to true.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color orange	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color red	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color sky blue	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
 Box 2: Yes
 The item color must be red, or item color contains blue. Box 3: Yes

NEW QUESTION 122

- (Topic 4)
 You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen. Which formula should you use?

- A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
- B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
- C. UpdateContext({ RunningTotal:5 }); Back()
- D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1. Use the Back and Navigate function to change which screen is displayed. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables>
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

NEW QUESTION 123

DRAG DROP - (Topic 4)
 You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app. Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
<input type="text" value="Business rule"/>	Guide a user through the set of steps needed for onboarding a new employee.	<input type="text"/>
<input type="text" value="Power Automate"/>	Make date of birth mandatory when creating a new employee record.	<input type="text"/>
<input type="text" value="Business process flow"/>	Implement an approval flow for expense reports submitted by employees.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Business process flow
 A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.
 Box 2: Business rule Box 3: Power Automate
 A Power Automate flow does not have any visual components like a business process flow. Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

NEW QUESTION 128

- (Topic 4)
 A company uses Microsoft Power Platform. You create a solution with components You deploy the solution in the production environment Users report issues with a process. You open the last imported solution. You need to troubleshoot the issue. What should you view?

- A. Solution dependencies
- B. Solution classic view
- C. History

Answer: D

NEW QUESTION 133

HOTSPOT - (Topic 4)

A coworker creates a canvas app.

The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect (
Toolbox,
{
  Tool: "Hammer",
  Quantity: 1
},
{
  Tool: "Screwdriver",
  Quantity: 2
}
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Records are added, not updated.

Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source.

Box 3: No

No records are cleared.

NEW QUESTION 135

DRAG DROP - (Topic 4)

A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area
Column	Data
Table	Excel data
Row	Customer data
Data source	Customer identifier
	Product data
	Component
	Component
	Component
	Component
	Component

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Table
 Box 2: Data source Box 3: Column
 Box 4: Row

NEW QUESTION 140

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Add Power Apps to Power BI using Power Apps for Power BI visualization. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 143

DRAG DROP - (Topic 4)

You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional

Users must be able to filter the dashboard. You need to determine how to apply the filters.

Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 144

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision a developer environment named D1 and a sandbox environment named S1.

? Copy the production environment to both D1 and S1.

? Use D1 for development and S1 for testing.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.

Note: Instead use two sandboxed environments: one for development and one for testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 148

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles. Development and testing must be performed using production data. Multiple testers must be used at each testing stage. You need to provision and configure new environments for development and testing. Solution:
 ? Provision sandbox environments named S1 and S2.
 ? Copy the production environment to both S1 and S2.
 ? Use S1 for development and S2 for testing.
 Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 153

- (Topic 4)

You create a new solution publisher and include a publisher prefix value. Which two actions can you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. You can change contact details of a publisher after you create the publisher
- B. When you change a solution publisher prefix, you can change the schema name for existing components
- C. You can change the schema name of a publisher after creating the publisher
- D. You can add a component from one solution to another solution that has a different publisher

Answer: AD

Explanation:

Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution-publisher>

NEW QUESTION 155

HOTSPOT - (Topic 4)

A company uses two SQL Server environments and two Common Data Service environments. The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct. You need to assign security access. What should you assign? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Role	Security access
Admin users for SQL environments	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;"> Environment Maker Environment Admin System Administrator and Environment Security group Power Platform Administrator and Environment Security group </div> </div>
Admin users for Common Data Service environments	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;"> Environment Maker Environment Admin Global Administrator System Administrator </div> </div>
Users that create Common Data Service apps	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;"> System Customizer Environment Maker Environment Admin System Administrator </div> </div>
Users that create SQL apps	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;"> System Customizer Environment Maker Environment Admin System Administrator </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: System Administrator and Environment Security group Security model for the databases

When a database is created, the users who have environment roles assigned to them, will continue to maintain those privileges.

Users with Environment Admin role are now assigned to System Administrator role. Users with Environment Maker continue to possess the same role.

Box 2: Environment Admin

The Environment Admin role can perform all administrative actions on an environment, including the following:

? Add or remove a user from either the Environment Admin or Environment Maker role.

Box 3: Environment Maker

Environment Maker: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment. More information:

Box 4: System Customizer

System Customizer: Has full permission to customize the environment. However, users with this role can only view records for environment entities that they create.

NEW QUESTION 156

- (Topic 4)

You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel. Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

- A. approval request in the Teams channel that requires a response from all approvers
- B. approval request in a chat with the three managers that requires a response from all approvers
- C. approval template that requires responses to be completed in order
- D. approval template that requires a response from all approvers

Answer: B

NEW QUESTION 157

HOTSPOT - (Topic 4)

You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.

The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:

- Update the Microsoft Dataverse record.
- Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.

Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action Action Trigger Function
Evaluate whether the Microsoft Dataverse record should be updated.	Condition Action Condition Data operation

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action
Evaluate whether the Microsoft Dataverse record should be updated.	Condition

NEW QUESTION 160

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<ul style="list-style-type: none"> On the header control. On each RiskStatus slider input. In the global variables of the Power Apps app. On the OnStart property of the Power Apps app.
Which formula should you use?	<ul style="list-style-type: none"> SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)>=150? "HIGH RISK" : "" IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)<150, "", HIGH RISK") Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatus3.value)>=150, "HIGH RISK") UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value>=150), "HIGH RISK")

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: On each RiskStatus slider input
 You can change the value based on input.
 Box 2: Updateif(..)

Use the Updateif function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.

NEW QUESTION 163

DRAG DROP - (Topic 4)

You use Microsoft Dynamics 365 Sales.

Business processes must use data from multiple applications. You need to implement the correct type of automation.

Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow Types	Answer Area						
cloud flow	<table border="1"> <thead> <tr> <th>Application Type</th> <th>Flow Type</th> </tr> </thead> <tbody> <tr> <td>Update a record after it was created as part of a sales process</td> <td></td> </tr> <tr> <td>Extract a list of prices from a competitor's website</td> <td></td> </tr> </tbody> </table>	Application Type	Flow Type	Update a record after it was created as part of a sales process		Extract a list of prices from a competitor's website	
Application Type		Flow Type					
Update a record after it was created as part of a sales process							
Extract a list of prices from a competitor's website							
desktop flow							
business process flow							

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 164

DRAG DROP - (Topic 4)

You have the following Common Data Service entities: BusinessContracts and

You need to configure an N:N relationship between the two entities.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select Add relationship and then select the many-to-many relationship option.	
Select the BusinessAccounts entity as the related entity.	
Open the relationship tab of the BusinessContracts entity.	
Choose the Relationship Name and Relationship Entity Prefix.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships

From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:

Step 2: Select Add relationship.. Create relationships

While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many.

Step 3: Select the BusinessAccounts entity as the related entity.

NEW QUESTION 168

- (Topic 4)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Data table
- B. Vertical gallery
- C. Display form
- D. Drop-down

Answer: AC

Explanation:

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

NEW QUESTION 172

- (Topic 4)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization
- D. Power Automate cloud flow

Answer: D

NEW QUESTION 175

- (Topic 4)

You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.

After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.

You need to determine why the background color changed.

What are two possible causes for the background color change? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You recently changed the Office 365 theme.
- B. You exported a managed copy of the solution and imported the solution as an unmanaged solution.
- C. You modified the canvas app in the unmanaged solution.
- D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
- E. You chose a different theme from the Theme menu inside the canvas app.

Answer: AC

Explanation:

A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.

C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.

Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding>

NEW QUESTION 180

- (Topic 4)

You create a canvas app.

You need to ensure that there are no screen reader issues in the app.

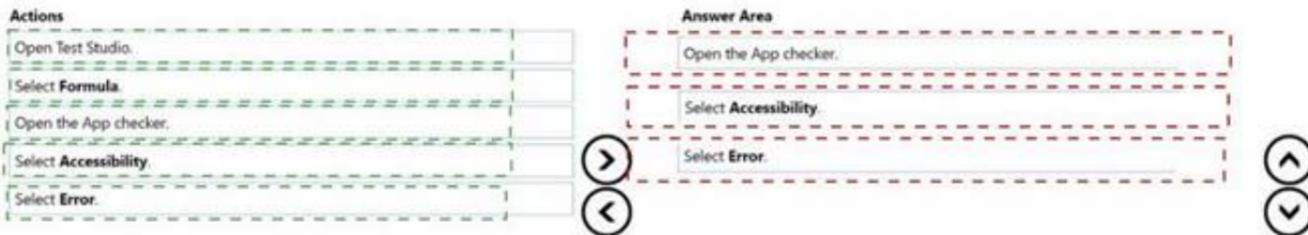

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 185

- (Topic 4)

A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. SQL Server Management Studio
- D. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to-one) relationships:

? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal

? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships>

NEW QUESTION 187

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create an Object Detection custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain.

Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 191

- (Topic 4)

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.

You are not able to activate the flow. You need to troubleshoot the issue.
 What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:

Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

NEW QUESTION 196

- (Topic 4)
 You are creating an app for a company. You need to evaluate the default solution.
 Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. You can change the prefix of the publisher of the default solution
- B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher in the publisher
- C. You can change the version number of the default solution

Answer: AC

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1>

NEW QUESTION 199

DRAG DROP - (Topic 4)
 You have a canvas app that uses multiple inputs for calculations.
 You must use Test Studio to create automated tests and confirm that the app works as expected.
 You need to organize your test scenarios into a hierarchy.
 In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Test assertions	
Test steps	⬅️
Test suites	➡️
Test cases	⬆️

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Test suites
 By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.
 Step 2: Test cases
 Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.
 Step 3: Test steps Step 4: Test assertions
 A test case consists of test steps that contain actions. Test actions are written using Power Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

NEW QUESTION 202

- (Topic 4)
 A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.
 You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.
 You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table

- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

Explanation:

Dataverse for Teams is the “lite” version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.

Reference:

<https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/>

<https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data>

NEW QUESTION 203

- (Topic 4)

You are creating a model-driven app that allows users to create and edit a list of existing accounts. You need to display a list of all active accounts. Which user interface components should you use?

- A. view
- B. gallery
- C. data table
- D. form

Answer: A

Explanation:

Imagine that you have a collection of data (such as a list sales orders, a set of service tickets, or a directory of contacts), and that you want to show this data in your Microsoft PowerApps app in a tabular format, where each column represents a field and each row represents a record. In the past, you might have been able to roughly simulate this visualization, although the process required some effort. However, we’ve been listening to your requests and are happy to announce that you can now quickly and easily achieve this very typical visualization by using the new Data table control that has been recently added to PowerApps.

Reference:

<https://powerapps.microsoft.com/fr-fr/blog/introducing-the-data-table-control/>

NEW QUESTION 205

- (Topic 4)

You create a model-driven app for a company. The app will be used to manage events that the company organizes.

The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.

All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.

You need to configure the MarketingTeam and OtherEmployees security roles.

Which three actions should you perform? Each correct selection presents a part of the

NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
- B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
- C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
- D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
- E. Set the access level for the MarketingTeam security role to None Selected for the Create and Write permission.
- F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 209

- (Topic 4)

A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.

Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. When a file is created trigger
- B. Get direct reports action
- C. Wait for an approval action
- D. When an item or a file is modified trigger
- E. When an item is created trigger
- F. Assign manager action
- G. Start and wait for an approval action
- H. Get manager action

Answer: AFG

NEW QUESTION 211

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process. The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

NEW QUESTION 212

- (Topic 4)

You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.

The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count.

You need to add logic to the app. What should you do?

- A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
- B. Create and configure a stopwatch custom control, and then add it to the gallery
- C. Create and configure a stopwatch custom component, and then add it to the aisle screen
- D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

Answer: C

Explanation:

Reference:

<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

NEW QUESTION 215

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 217

- (Topic 4)

You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.

You need to ensure that you can transfer the flow to another environment. What should you do?

- A. Add the flow to the default solution of the development environment and export as a managed solution.
- B. Change the environment for the flow.
- C. Add the flow to the existing solution.
- D. Add the flow to the default solution of the production environment.

Answer: A

Explanation:

It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment. Exporting our Solution

After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the ..., selecting Export.

Reference:

<https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/>

NEW QUESTION 220

- (Topic 4)

Engineers in an organization plan to attend an international product show.

The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.

You need to provide a button flow to streamline the process.

Which two AI Builder models should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: AD

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return "en" instead of "en-US". The response for languages that can't be detected is unknown.

Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 222

- (Topic 4)

A company creates multiple cases in Microsoft Dataverse each day with a status of New.

For all cases with a status of New, the system must send an email to the customer and then change the status to in Process.

You need to create a Microsoft Power Automate cloud flow to automatically send the email. What should you do?

- A. Trigger the flow on a schedule and then configure the flow to use the Compose data operation to get a list of cases and send email to each from inside a loop.
- B. Trigger the flow on a schedule and then configure the flow to use the Dataverse Listrows action to query case records using a filter and send email to each from inside a loop.
- C. Trigger the flow manually on the case and then configure the flow to send the email.

Answer: B

NEW QUESTION 227

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:

- * Create a model-driven app.
- * Design navigation for the app
- * Show an approval name field on the form if the amount is greater than \$1,000.

Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	<input type="checkbox"/> App designer <input checked="" type="checkbox"/> App designer <input type="checkbox"/> Solution checker <input type="checkbox"/> App checker
Design app navigation.	<input type="checkbox"/> Site map <input checked="" type="checkbox"/> Site map <input type="checkbox"/> Solutions area <input type="checkbox"/> Table designer
Show approval name field if amount > \$1,000.	<input type="checkbox"/> Table designer <input type="checkbox"/> Form designer <input checked="" type="checkbox"/> Table designer <input type="checkbox"/> Business rule designer

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Activity	Feature
Create model driven app.	App designer App designer Solution checker App checker
Design app navigation.	Site map Site map Solutions area Table designer
Show approval name field if amount > \$1,000.	Table designer Table designer Form designer Table designer Business rule designer

NEW QUESTION 230

DRAG DROP - (Topic 4)

You are designing a canvas app that will be used by all users including users who have

Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Visible to sighted users only	Set the Color and other related properties of a control to transparent.	Outcome
Visible to screen-reader users only	Set the Height and Width properties of a control to 1.	Outcome
Visible to both sighted and screen-reader users		

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen.	Visible to sighted users only
Visible to sighted users only	Set the Color and other related properties of a control to transparent.	Visible to screen-reader users only
Visible to screen-reader users only	Set the Height and Width properties of a control to 1.	Not visible to any users
Visible to both sighted and screen-reader users		

NEW QUESTION 234

- (Topic 4)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

Answer: C

NEW QUESTION 236

- (Topic 4)

You significantly modify a canvas app. You need to generate a new app version. What should you do?

- A. Publish the app.
- B. Update the major version number.
- C. Update the version notes.
- D. Update the minor version number.
- E. Save the app.

Answer: A

NEW QUESTION 237

HOTSPOT - (Topic 4)

A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

Share Company App

Enter a name, email address, or Everyone

Shared with Sort by Name ▾

- BJ Bill Jones
Owner
- JS Jim Smith
Co-owner ✕
- PU Power Users
User ✕

Power Users

This User can use this app

Co-owner
Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

Share Company App

Enter a name, email address, or Everyone

Shared with Sort by Name ▾

- BJ Bill Jones
Owner

User ✕

Jim Smith

This User can use this app

Co-owner
Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	<input type="radio"/>	<input type="radio"/>
When using the canvas app, a member of the Power Users group can see version 4.	<input type="radio"/>	<input type="radio"/>
If version 2 of the canvas app is restored, it will be labelled as the Live version.	<input type="radio"/>	<input type="radio"/>
If Jim Smith edits the canvas app he will be editing version 4.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

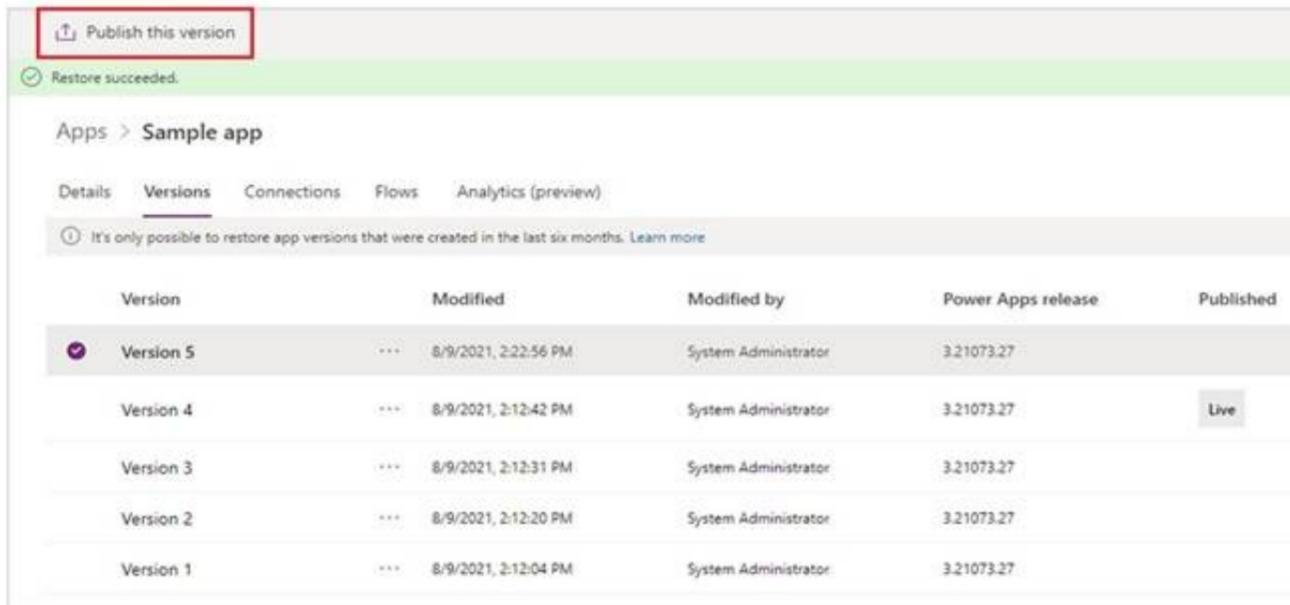

They can only use the app.

Box 2: Yes

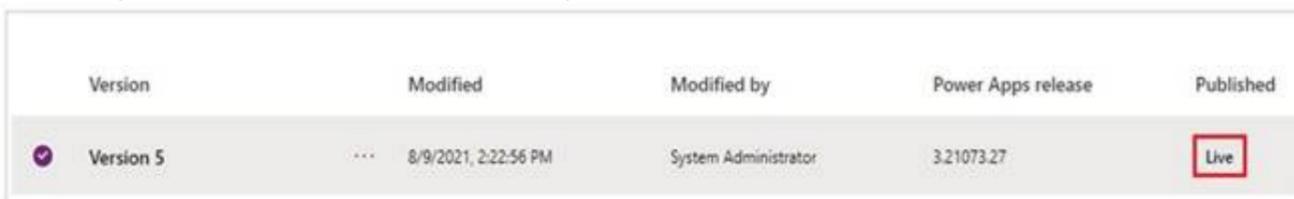

Box 3: No

You would need to publish Version 2 to make it live.

Note: If you want to publish the restored version, select Publish this version, and then select Publish this version when prompted to confirm.

Notice the published restore version that shows up as Live.

Box 4: Yes

The most recent version of any app is available only to those who have edit permissions for it.

NEW QUESTION 242

HOTSPOT - (Topic 4)

HOTSPOT

The customer service team of a company uses a model-driven app to log customer interactions. The app contains two tables: one to track customer interactions and one to track products.

The team requires an interactive dashboard to display the activities. The dashboard must display the products that have the most complaints. Each chart must display the associated data.

You need to create the dashboard-

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 244

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

- A. Address input
- B. List box
- C. Gallery
- D. Data table

Answer: C

NEW QUESTION 246

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Automate. You manage two cloud flows named A and B. Users must perform the following activities:

- Manage the properties of cloud flow A.
- Manually trigger cloud flow B

You need to set up privileges for the business users by using the principle of least privilege Which privilege types should you grant for each activity? To answer, drag the appropriate privilege types to the correct activities. Each privilege type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

NEW QUESTION 260

- (Topic 4)

You are designing an interactive report for a model-driven app. The report will use more than five million records. The query that retrieves data for the report requires more than five minutes to complete.

You need to create the report. Which option should you use?

- A. Interactive dashboard
- B. Power BI
- C. Standard dashboard

Answer: B

NEW QUESTION 261

DRAG DROP - (Topic 4)

DRAG DROP

You are designing several new Microsoft Power Platform apps for a company. You have the following requirements:

All apps must be able to run from the Power Apps mobile app.

You need to determine which app type to create for each department.

Which app type should you use? To answer, drag the appropriate app types to the correct departments. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 266

DRAG DROP - (Topic 4)

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Relationship types	Answer Area		
	Relationship		
	Source entity	Target entity	Relationship type
One-to-one	Clients	Bank accounts	Relationship type
One-to-many	Clients	Branch offices	Relationship type
Many-to-one	Branch offices	Employees	Relationship type
Many-to-many			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Many-to-many

Box 2: Many-to-one

A client have a single branch office.

A branch office can have many clients.

Box 3: One-to-many

A branch office can have many employees. An employee only works at one branch office.

NEW QUESTION 271

HOTSPOT - (Topic 4)

: 189 HOTSPOT

A company is building several Power Apps apps to help with sales operations collaboration. You need to identify the right solution for data storage. Which solution should you use? To answer select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Characteristic	Solution
Limits the number of records that can be added.	<input checked="" type="checkbox"/> Microsoft Dataverse for Teams <input type="checkbox"/> Microsoft Dataverse <input type="checkbox"/> Microsoft Dataverse for Teams
Allows for advanced development tasks for apps specific to Microsoft Teams.	<input type="checkbox"/> Microsoft Dataverse <input type="checkbox"/> Microsoft Dataverse <input checked="" type="checkbox"/> Microsoft Dataverse for Teams
Has the most granular level of security to account for column-level security in Microsoft Teams.	<input type="checkbox"/> Microsoft Dataverse <input type="checkbox"/> Microsoft Dataverse <input checked="" type="checkbox"/> Microsoft Dataverse for Teams

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 275

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision a trial environment named T1 and a sandbox environment named S1.
 ? Copy the production environment to T1 and S1.
 ? Use T1 for development and S1 for testing.
 Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Using trial environments, companies and customers can try out new features and solutions. Do not use a trial environment for development. A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/trial-environments> <https://docs.microsoft.com/en-us/power-platform/admin/sandbox-environments>

NEW QUESTION 277

HOTSPOT - (Topic 4)

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code.

Sales associates must be able to act on the specific data displayed in dashboards. You need to create the dashboards.

Which type of dashboards should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of dashboard
Ensure that all sales associates can view the dashboard.	<input type="checkbox"/> User <input type="checkbox"/> System
Ensure that sales associates can interact with data from the dashboards.	<input type="checkbox"/> Standard <input type="checkbox"/> Multi-stream <input type="checkbox"/> Single-stream

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: User

Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.

Box 2: Single-stream

The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier 2 service leads or managers, who monitor fewer, but more complex or escalated cases.

NEW QUESTION 281

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Uninstall the most recent version of the solution from the production environment. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 283

DRAG DROP - (Topic 4)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

App types

- Canvas app
- Model-driven app
- Embedded canvas app

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

App types

- Canvas app
- Model-driven app
- Embedded canvas app

Answer Area

Group	App type
Reception area staff	Canvas app
Medical staff	Embedded canvas app
Cleaning staff	Model-driven app

NEW QUESTION 287

DRAG DROP - (Topic 4)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app. You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects

- Display
- Screens
- Components

Answer Area

Action	Location
Import a custom control from a file.	
Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	

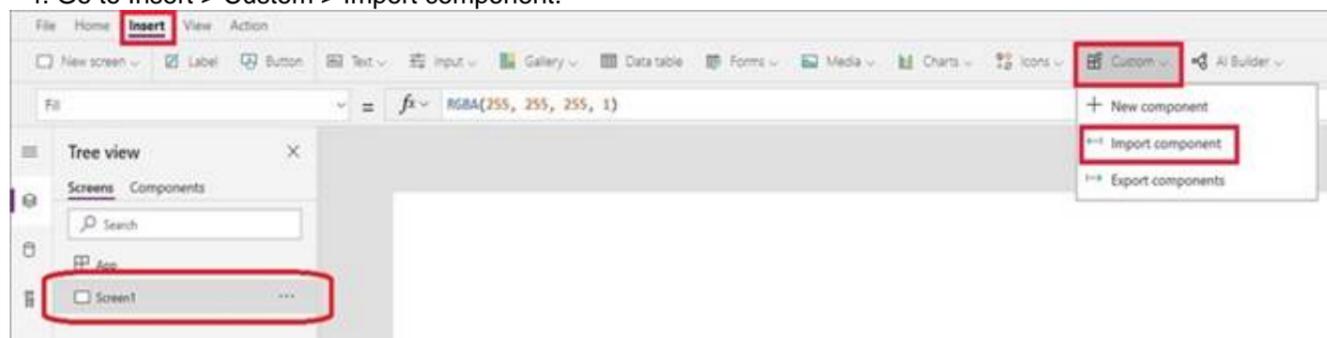

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Components

- * 1. To add code components to a canvas app:
- * 2. Navigate to Power Apps Studio.
- * 3. Create a new canvas app or edit an existing app to which you want to add the code component.
- * 4. Go to Insert > Custom > Import component.

NEW QUESTION 290

DRAG DROP - (Topic 4)

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants. The education level at the time of enrollment is an option set in the student entity. The

- ? High school
- ? College

? Bachelor

You must split the College option into two option sets:

? College – 1 Year

? College – 2 years

The split must not impact existing data. You need to create the two option sets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Open the maker app and navigate to the student table		
Publish the student entity		
Save the student table	➤	⬆
Open settings in the Power Platform admin center	⬅	⬇
Create new options for College - 1 Year and College - 2 years		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions		Answer Area
Open the maker app and navigate to the student table		Open the maker app and navigate to the student table
Publish the student entity		
Save the student table	➤	Create new options for College - 1 Year and College - 2 years
Open settings in the Power Platform admin center	⬅	Publish the student entity
Create new options for College - 1 Year and College - 2 years		

NEW QUESTION 294

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps and Microsoft Dataverse.

The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:

- Share model-driven apps in multiple Microsoft Dataverse environments.
- Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.

You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the

appropriate security roles to the correct requirements. Each security role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Security roles	Requirement	Security role
System Customizer	Share in all Microsoft Dataverse environments.	
Microsoft Power Platform Administrator	Share in one environment and view only table records they create.	
Environment Maker		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Security roles	Requirement	Security role
System Customizer	Share in all Microsoft Dataverse environments. Share in one environment and view only table records they create.	Environment Maker
Microsoft Power Platform Administrator		System Customizer
Environment Maker		

NEW QUESTION 296

- (Topic 4)

You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.

You plan to deploy the solution to Canada.

You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. View results in the Service Trust portal.
- B. Check the results of the Solution checker.
- C. Identify regulations for the region where the tenant resides.
- D. Identify all regulations for the region where the Common Data Service database resides.
- E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:

A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.

D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal>

NEW QUESTION 301

- (Topic 4)

A clothing retailer is creating a Power Virtual Agents chatbot in Microsoft Teams. The chatbot will use Microsoft Dataverse for Teams to provide sales metrics by store.

A user wants to be able to ask the chatbot to see all the sales for pants.

You need to configure the chatbot to provide sales data for pants even when a user enters the terms jeans, slacks, or trousers.

Which chatbot component should you use?

- A. Skills
- B. Tables
- C. Topics
- D. Supported languages
- E. Entities

Answer: E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 304

- (Topic 4)

A company has 500 vendor records stored in a SQL table. Each record contains the

team wants to view the vendor records by using Power Apps. The team must be able to change the list results by applying filters. You need to display the vendor records in a canvas app. Which control should you use?

- A. Text
- B. Form
- C. Chart
- D. Gallery

Answer: D

NEW QUESTION 308

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the development environment. Export the solution as a managed solution, import the solution into production

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 310

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Append filter parameter to Power BI report URL. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 313

- (Topic 4)

You create and publish a canvas app component library to perform complex calculations.

You discover an error in one of the calculations. You correct the issue and publish the canvas app.

You need to ensure that the co-worker uses the updated version of the component library.

What should you do?

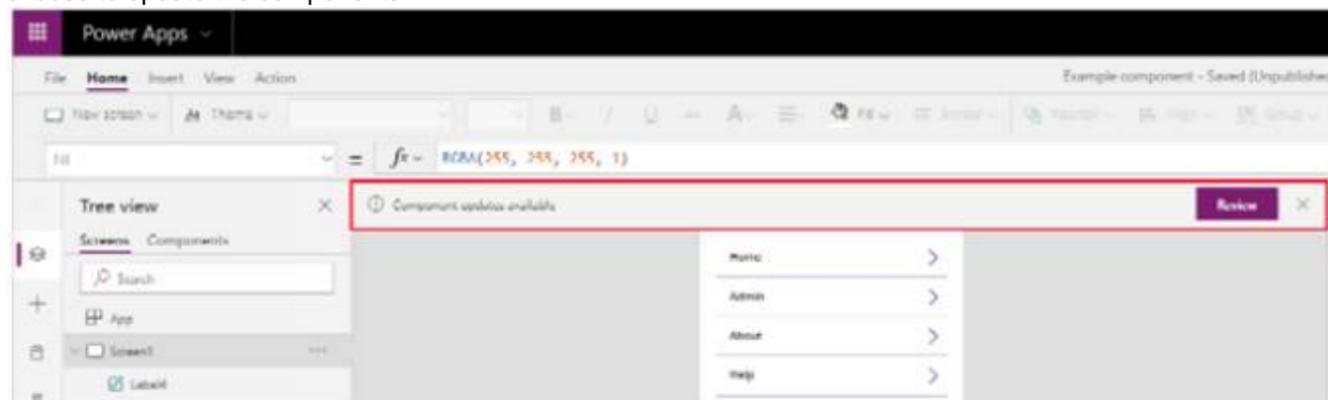

- A. Export the updated component library and instruct the co-worker to import the updated version into the canvas app
- B. Inform the co-worker to edit the canvas app and manually add the updated version of the component library
- C. Instruct the co-worker to edit the canvas app and update the component library

Answer: C

Explanation:

You can modify an existing component library and save any changes with additional version notes. However, the updated component library version must be published for use in existing apps that use the component library.

Makers of other apps are notified of updated components being available. The notification appears when makers edit the apps in canvas app studio. They can choose to update the components:

Select Review, and you'll see the option to update the component:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>
